

Supplementary Figure 8. Comparable dosage of inosine in *R.i* CM has no anti-tumor effects in vitro. Comparable dosage of inosine in *R.i* CM (0.4 μ g/ml) had no suppressive effects on colonic cell viability (A), cell apoptosis (B) and cell cycle (C) Comparable dosage of inosine had no effects on Granzyme B⁺, IFN- γ ⁺, TNF- α ⁺ CD8⁺ T cells isolated from C57BL/6 mouse spleen.
