

Supplementary Fig. S1. Effect of Consti-Biome and Sensi-Biome on RAW264.7 cell viability.

RAW264.7 cells were seeded in 96-well plates for 24 h. Cells were treated with (A) Consti-Biome or (B) Sensi-Biome in a dose-dependent manner for 24 h. Viability was assessed by MTT assay and expressed as a percentage (%) of control. The values are expressed as the mean \pm SD. A significant difference from the control was indicated as, * $p < 0.05$, ** $p < 0.01$, or *** $p < 0.001$.
