1	record_id	Record ID	text
2	consent_text	The Ohio State University Consent to Participate in Research Online Implementation Survey Study Title: Determinants of Implementation Success Coordinating Ventilator, Early Ambulation and Rehabilitation Efforts in the ICU (DISCOVER-ICU) Researcher: Michele Christina Balas PhD, RN, CCRN-K, FCCM, FAAN Sponsor: National Heart, Lung, and Blood Institute (NIH) This is a consent form for research participation. It contains important information about this study and what to expect if you decide to participate. Your participation is voluntary. Please consider the information carefully. Feel free to ask questions before making your decision whether or not to participate. Purpose: The purpose of the DISCOVER-ICU study is to develop multilevel implementation strategies to enhance sustainable uptake of the ABCDEF bundle into routine clinical practice. This survey provides the name and definition of variable actions/strategies used to increase adoption of evidence-based intensive care unit (ICU) practices. We are interested in learning what actions/strategies your ICU team used to facilitate adoption of the ABCDEF bundle during the course of time you spent participating in the Society of Critical Care Medicine's ICU Liberation Collaborative that began on August 1st, 2015 and concluded on April 30th, 2017. We are also interested in discovering whether your team found these actions/strategies helpful, acceptable, feasible, and costly. Procedures/Tasks: We ask that you engage colleagues from various disciplines (e.g., nursing, medicine, pharmacy, respiratory/physical/occupational therapy) who worked in your unit during the ICU Liberation Collaborative in completion of the survey. There is no set approach in garnering your team's input. We encourage you to do what is best for you and your ICU team. You may choose to: 1) Conduct a meeting specifically focused on completing the online survey. During this team meeting, the online survey could be accessed, questions discussed, and responses entered simultaneously. We recommend this approach as it is likely to be the most comprehensive and least time consuming. 2) Print a hardcopy of the survey to discuss and complete during a regularly scheduled or small group team meeting. Once the survey is complete, one team member would then enter the site data into the online survey. 3) Print hardcopies of the survey and ask each team member to complete it individually. Once responses are received, one team member would then resolve any conflicting answers and enter the site data into the online survey. 4) Distribute a word or PDF version of the survey via email communication to team members. Completed surveys could then be given to one team member who would then resolve any conflicting answers and enter the site data into the online survey. There may be some disagreements among professionals on various aspects of the survey. Because only one survey may be submitted per site, we ask you complete it as well as you can and as closely aligned with the team's consensus as possible. If necessary, we suggest the team member who played the most active role in ABCDEF bundle implementation efforts resolves any disagreements. Duration: Because we are requesting the engagement of multiple stakeholders, we anticipate that the time necessary to complete the survey may vary by site. We estimate it will take approximately 20 minutes for an individual to complete the survey and approximately 40-50 minutes to complete the survey if discussed during a team meeting. You may leave the study at any time. If you decide to stop participating in the study, there will be no penalty to you, and you will not lose any benefits to which you are otherwise entitled. Your	descriptive

		<p>decision will not affect your future relationship with The Ohio State University. Risks and Benefits: There are no known physical or psychologic risks to being in the study. You may skip any survey questions you do not wish to answer. You will not receive any benefit from study participation, but your opinions and experiences may contribute to a better understanding of what strategies are most beneficial in terms of increasing ABCDEF bundle adoption. Confidentiality: We will work to make sure that no one sees your online responses without approval. But, because we are using the Internet, there is a chance that someone could access your online responses without permission. In some cases, this information could be used to identify you. Your data will be protected with a code to reduce the risk that other people can view the responses. Also, there may be circumstances where this information must be released. For example, personal information regarding your participation in this study may be disclosed if required by state law. Also, your records may be reviewed by the following groups (as applicable to the research): · Office for Human Research Protections or other federal, state, or international regulatory agencies; · The Ohio State University Institutional Review Board or Office of Responsible Research Practices; · The sponsor, if any, or agency (including the Food and Drug Administration for FDA-regulated research) supporting the study Future Research: Your de-identified information may be used or shared with other researchers without your additional informed consent. Incentives: Each team member who participates in completing the survey, maximum of four team members per site, will receive a \$25 Amazon gift card. In addition, the person responsible for entering the site data into REDCap will receive an additional \$25 Amazon gift card. Reimbursement will occur once all of the survey data is entered into REDCap. By law, payments to participants are considered taxable income. Participant Rights: You may refuse to participate in this study without penalty or loss of benefits to which you are otherwise entitled. If you are a student or employee at Ohio State, your decision will not affect your grades or employment status. If you choose to participate in the study, you may discontinue participation at any time without penalty or loss of benefits. By agreeing to participate, you do not give up any personal legal rights you may have as a participant in this study. An Institutional Review Board responsible for human subjects research at The Ohio State University reviewed this research project and found it to be acceptable, according to applicable state and federal regulations and University policies designed to protect the rights and welfare of participants in research. Contacts and Questions: For questions, concerns, or complaints about the study, or you feel you have been harmed as a result of study participation, you may contact Dr. Michele Balas via email at balas.17@osu.edu or by telephone at 614-688-2050. For questions about your rights as a participant in this study or to discuss other study-related concerns or complaints with someone who is not part of the research team, you may contact the Office of Responsible Research Practices at 1-800-678-6251 or hsconcerns@osu.edu. Providing consent I have read (or someone has read to me) this page and I am aware that I am being asked to participate in a research study. I have had the opportunity to ask questions and have had them answered to my satisfaction. I voluntarily agree to participate in this study. I am not giving up any legal rights by agreeing to participate. To print or save a copy of this page, select the print button on your web browser.</p>

[^ Collapse](#)

5	instructions	<p>Instructions Purpose: This survey provides the name and definition of variable actions/strategies used to increase adoption of evidence-based ICU practices. We are specifically interested in learning what actions/strategies your ICU team used to facilitate adoption of the ABCDEF bundle during the Society of Critical Care Medicine's ICU Liberation Collaborative that began on August 1st, 2015 and concluded on April 30th, 2017. We are also interested in discovering whether your team found these actions/strategies helpful, acceptable, feasible, and costly. Who: Each ICU Liberation Collaborative site is allowed to submit one survey. We ask that you engage colleagues from various disciplines (e.g., nursing, medicine, pharmacy, respiratory/physical/occupational therapy) who worked in your unit during the ICU Liberation Collaborative in completion of this survey. Each team member who participates in completing the survey, maximum of four team members per site, will receive a \$25 Amazon gift card. In addition, the person responsible for submitting the online survey will receive an additional \$25 Amazon gift card. Reimbursement will occur once all of the online survey data is submitted. Time: Estimated at 20 minutes for individuals; approximately 40-50 minutes for team gathering and joint completion. Strategies: There is no set approach in garnering your team's input. We encourage you to do what is best for you and your ICU team. There may be some disagreements among professionals on various aspects of the survey. Because only one survey may be submitted per site, we ask you complete it as well as you can and as closely aligned with the team's consensus as possible. If necessary, we suggest the team member who played the most active role in ABCDEF bundle implementation efforts resolves any disagreements. Your team may choose to: 1) Conduct a meeting specifically focused on completing the online survey. During this team meeting, the online survey could be accessed, questions discussed, and responses entered simultaneously. We recommend this approach as it is likely to be the most comprehensive and least time consuming. 2) Print a hardcopy of the survey to discuss and complete during a regularly scheduled or small group team meeting. Once the survey is complete, one team member would then enter the site data into the online survey. 3) Print hardcopies of the survey and ask each team member to complete it individually. Once responses are received, one team member would then resolve any conflicting answers and enter the site data into the online survey. 4) Distribute a word or PDF version of the survey via email communication to team members. Completed surveys could then be given to one team member who would then resolve any conflicting answers and enter the site data into the online survey. Action: Reflect on the actions/strategies your team used during the course of the ICU Liberation Collaborative to increase your ICUs' adoption of the ABCDEF bundle. For each item presented, select either "yes or no" to indicate whether your team used the action to increase adoption of the ABCDEF bundle or its individual elements. If "no" is selected, proceed to next question. If "yes" is selected, you will be asked to rate how helpful, acceptable, feasible, and costly using the action/strategy was. In total, there are 73 actions/strategies that are divided among 9 sections. Please note: several of the actions/strategies may be unfamiliar to you and not all strategies are applicable to ABCDEF bundle implementation. There are no "correct answers" or minimum amount of actions/strategies that should be reported. We are simply interested in learning what actions/strategies your ICU team used. The next survey section (i.e., section 10) will give you the opportunity to describe any other actions/strategies that your team used to increase ABCDEF bundle adoption that were not presented previously. The final section of this survey will collect basic information regarding site characteristics and who assisted in completion of the survey. Should you have any comments or questions regarding the survey, please feel free to contact Lori Harmon (SCCM) at lharmon@sccm.org or Michele Balas (PI) at balas.17@osu.edu. Please click on "Next Page >>" below to continue to the survey.</p>	descriptive

453	section_10_text	Section Header: SECTION 10: ADDITIONAL ACTIONS This section provides you an opportunity to share any additional actions/strategies that your team used to increase adoption of the ABCDEF bundle during the course of the ICU Liberation Collaborative that may not have been provided/described in Sections 1-9. We ask that you enter a brief name for the action/strategy taken and provide a short description of what the action/strategy involved in the fields below. Finally, please rank the action/strategy in terms of how helpful, acceptable, feasible, and costly it was. You may enter as many additional actions/strategies as you like. This section can be left blank if Sections 1-9 adequately described all of the actions/strategies your team used to facilitate ABCDEF bundle adoption.	descriptive
