Supplementary Table S1: Results from Independent Samples T-Tests comparing covariates between inconsistent hearing aid users and hearing aid non-users.
The two groups did not significantly differ by any collected covariate metric.

	t	df	p
Age	-1.479	30.647	0.149
Sex	-0.377	31.516	0.709
Race	-0.802	25.134	0.430
