COREQ (COnsolidated criteria for REporting Qualitative research) Checklist

A checklist of items that should be included in reports of qualitative research. You must report the page number in your manuscript where you consider each of the items listed in this checklist. If you have not included this information, either revise your manuscript accordingly before submitting or note N/A.

Domain 1: Research team and reflexivity 6 Personal characteristics 1 Interviewer/facilitator 1 Which author/s conducted the interview or focus group? 1 Credentials 2 What were the researcher's credentials? E.g. PhD, MD 6 Occupation 3 What was their occupation at the time of the study? 6 Gender 4 Was the researcher male or female? 6 Experience and training 5 What experience or training did the researcher have? 6 Relationship with participants 6 8 6 6	Торіс	Item No.	Guide Questions/Description	Reported on Page No.	
and reflexivity 6 Personal Characteristics 1 Which author/s conducted the interview or focus group? 6 Credentials 2 What was their occupation at the time of the study? 6 Occupation 3 What was their occupation at the time of the study? 6 Sender 4 Was the researcher male or female? 6 Experience and training 5 What experience or training did the researcher have? 6 Relationship with	Domain 1. Desearch toom			Page NO.	
Personal characteristics 1 Which author/s conducted the interview or focus group? 1 6 Credentials 2 What were the researcher's credentials? E.g. PND, MD 6 6 Gender 4 Was the researcher male or female? 6 6 Experience and training 5 What experience or training did the researcher have? 6 Relationship with participants 6 6 6 Relationship setablished 6 Was a relationship established prior to study commencement? 6 Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research 6 Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? 6 Domain 2: Study design 7 e.g. Bias, assumptions, reasons and interests in the research topic 7 Domain 4: Study design 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Methodological orientation approach 11 How were participants selected? e.g. home, dinic, workplace 7 Sample size 12 How many participants were in the study? 8 8 6					
Interviewer/facilitator 1 Which author/s conducted the interview or focus group? 6 Credentials 2 What was the researcher's credentials? E.g. PbJ, MD 6 Cocupation 3 What was their occupation at the time of the study? 6 Gender 4 Was the researcher male or female? 6 Experience and training 5 What experience or training did the researcher have? 6 Relationship with porticipants for a study commencement? 6 Relationship established 6 Was a relationship established prior to study commencement? 6 Participants 6 Relationship established 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research the interviewer 1 goals, reasons for doing the research 1 Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic Domain 2: Study design Theoretical framework Methodological orientation 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis Participant selection Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email Sample size 12 How many participants were in the study? 8 Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace 7 Presence of non- 15 Was anyone else present besides the participants and researcher? 8 Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date 7 Data collection 7 Repeat interviews 18 Were repeat interviews carried out? Hyes, how many? 7 Audio/visual recording 19 Did the research or focus group? 7 Audio/visual recording 19 Did the research or focus group? 7 Data saturation 21 What was the duration of the inter views of focus group? 7 Data saturation 22 Was data saturation discussed? 7 Deats aturation 21 W					
Credentials 2 What were the researcher's credentials? E.g. PhD, MD 6 Occupation 3 What was their occupation at the time of the study? 6 Sender 4 Was the researcher male or female? 6 Experience and training 5 What experience or training did the researcher have? 6 Relationship with participants 6 Was a relationship established prior to study commencement? 6 Participant knowledge of the interviewer 7 What did the participants know about the research topic 6 Domain 2: Study design 6 e.g. Bias, assumptions, reasons and interests in the research topic 6 Domain 2: Study design 7 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 5 Participant selection 5 9 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Sample size 12 How many participants approached? e.g. face-to-face, telephone, mail, email 5		1	Multich and have do not added the interview on factor strains?	1, 6	
Cloudination 2 What were the rescurption as the time of the study? 6 Occupation 3 What was the recouption as the time of the study? 6 Sender 4 Was the researcher male or female? 6 Experience and training 5 What experience or training did the researcher have? 6 Experience and training 6 Was a relationship established prior to study commencement? 6 Participant Knowledge of 7 What dhar participants know about the researcher? e.g. personal goals, reasons for doing the research 6 Demain 2: Study design 7 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic 6 Domain 2: Study design 7 What methodological orientation was stated to underpin the study? e.g. and Theory 7 Methodological orientation 9 What methodological orientation was stated to underpin the study? e.g. and Theory 7 Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Method of approach 11 How many people refused to participater or dropped out? Reasons? 8 Sample size 12 How many people refused to participants and res	•			6	
Gender 4 Was the researcher male or female? 6 Experience and training 5 What experience or training did the researcher have? Relationship with 6 Relationship established 6 Was a relationship established prior to study commencement? 6 Participants 6 Interviewer goals, reasons for doing the research 6 Interviewer characteristics 8 What characteristics were reported about the inter viewer/facilitator? 6 Domain 2: Study design 7 Content analysis 7 Theoretical framework 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 5 5 6 Sampling 10 How were participants selected? e.g. face-to-face, telephone, mail, email 5 Sample size 12 How many participants were in the study? 8 Setting 5 8 5 Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace 7 Presence of non- 15 Was any one else present				6	
Genden 4 Was the researcher intage of reinated in tendent Relationship with participants 6 Relationship established 6 Was a relationship established prior to study commencement? 6 Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research 6 Domain 2: Study design 6 Theoretical framework 8 What methodological orientation and interests in the research topic 6 Domain 2: Study design 7 Theoretical framework 7 Methodological orientation and there participants selected? e.g. purposive, convenience, consecutive, snowball 7 And Theory 9 What methodological orientation was stated to underpin the study? e.g. and theory email, email 5 Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Methodol of approach 11 How wany people refused to participate or dropped out? Reasons? 8 Sample size 12 How many people refused to participants and researchers? 8 Setting 5 5 6 Description of sample				6	
Relationship with participants 6 Relationship established 6 Was a relationship established prior to study commencement? 6 Relationship established 7 What did the participants know about the research? e.g. personal goals, reasons for doing the research about the inter viewer/facilitator? 6 Domain 2: Study design 6 6 Theoretical framework 7 What nethodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 5 6 6 Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Method of approach 11 How many participants were in the study? 8 Setting 8 8 6 8 Setting 9 What are the important characteristics of the sample? e.g. demographic data, date 7 Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date 7 Description o				0	
participants 6 Relationship established 6 Was a relationship established prior to study commencement? 6 Participant knowledge of 7 What did the participants know about the research reg. g. personal goals, reasons for doing the research 6 Interviewer goals, reasons for doing the research 6 6 Domain 2: Study design 6 6 6 Theoretical framework 6 6 6 Methodological orientation 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 7 6 6 Sampling 10 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Method of approach 11 How were participants were in the study? 8 Sample size 12 How many participants were in the study? 8 6 Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace 7 7 Presence of non- 15 Was anyone else present besides the participants and researchers? 8 6 6	Experience and training	5	What experience or training did the researcher have?		
Relationship established 6 Was a relationship established prior to study commencement? 6 Participant knowledge of 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research 6 Interviewer 8 What draracteristics were reported about the inter viewer/facilitator? 6 Domain 2: Study design 7 What methodological orientation was stated to underpin the study? e.g. and Theory 7 and Theory 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 9 How were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Method of approach 11 How were participants approached? e.g. face-to-face, telephone, mail, email 5 Sample size 12 How many participants were in the study? 8 6 Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace 7 Presence of non- 15 Was anyone else present besides the participants and researchers? 8 6 Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date	•				
Participant knowledge of the interviewer 7 What did the participants know about the researcher? e.g. personal goals, reasons for doing the research 6 Interviewer 8 What characteristics were reported about the inter viewer/facilitator? e.g. Bias, assumptions, reasons and interests in the research topic 6 Domain 2: Study design 7 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, content analysis 7 Participant selection 9 What methodological orientation was stated to underpin the study? e.g. grounded theory, discourse analysis, ethnography, phenomenology, consecutive, snowball 5 Method of approach 11 How were participants selected? e.g. noreoptic, convenience, consecutive, snowball 5 Sample size 12 How many participants were in the study? 8 Setting of data collection 14 Where was the data collected? e.g. home, clinic, workplace 8 Presence of non- participants 15 Was anyone else present besides the participants and researchers? 8 Description of sample 16 What are the important characteristics of th	participants	_		6	
Participant knowledge of presents 7 What due the participants know adout the research of goals, reasons for doing the research or goals, reasons and interests in the research topic Domain 2: Study design 8 What characteristics were reported about the inter viewer/facilitator? 6 Domain 2: Study design 7 e.g. Bias, assumptions, reasons and interests in the research topic 7 Demetodal framework Methodological orientation and theory, discourse analysis, ethnography, phenomenology, content analysis 7 7 Participant selection 9 What were participants selected? e.g. purposive, convenience, consecutive, snowball 5 Sampling 10 How were participants were in the study? 6 6 Non-participation 13 How many people refused to participants and researchers? 8 Setting 8 6 6 6 Description of sample 16 What are the important characteristics of the sample? e.g. demographic data, date 7 Data collection 17 Were questions, prompts, guides provided by the authors? Was it pilot tested? 7 Repeat interviews 18 Were repeat inter views carried out? If yes, how many?	Relationship established	6	Was a relationship established prior to study commencement?

Domain 3: analysis and			7
findings			/
Data analysis			7
Number of data coders	24	How many data coders coded the data?	
Description of the coding	25	Did authors provide a description of the coding tree?	7
tree			7
Derivation of themes	26	Were themes identified in advance or derived from the data?	-7
Software	27	What software, if applicable, was used to manage the data?	
Participant checking	28	Did participants provide feedback on the findings?	
Reporting			20-27
Quotations presented	29	Were participant quotations presented to illustrate the themes/findings?	
		Was each quotation identified? e.g. participant number	8-12
Data and findings consistent	30	Was there consistency between the data presented and the findings?	8-12
Clarity of major themes	31	Were major themes clearly presented in the findings?	8-12
Clarity of minor themes	32	Is there a description of diverse cases or discussion of minor themes?	L

Developed from: Tong A, Sainsbury P, Craig J. Consolidated criteria for reporting qualitative research (COREQ): a 32-item checklist for interviews and focus groups. *International Journal for Quality in Health Care*. 2007. Volume 19, Number 6: pp. 349 – 357

Once you have completed this checklist, please save a copy and upload it as part of your submission. DO NOT include this checklist as part of the main manuscript document. It must be uploaded as a separate file.
