

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: List of 3,684 compound IDs used in the compound screening in Figure 1a

File name: Supplementary Data 2

Description: Optimal compound concentrations used in apoptosis (Fig. 1c), necroptosis (Fig. 1d), FIN56 (Fig. 1e), and C11-BODIPY (Fig. 1f) testing.

File name: Supplementary Data 3

Description: Human and mouse qRT-PCR primers.
