Data charting form

Record	Author(s)
	Year
Policy	Country
	World region (World Bank grouping) (126)
	Country income (World Bank grouping) (126)
	Disease
	Non-government stakeholder or sector responsible for implementing policy (retail, agriculture, conservation, etc.)
	Implementation date (start date, or range if the policy has been changed)
	Intervention type
	Location along spillover pathway adapted from Plowright et al. (8,22)
	Policy level (local, national, regional, global)
	Multi-sectoral initiative (Y/N)
	Government sector(s) responsible for policy
Evaluation	Aim
	Evaluation type (formative, process, outcome, economic, impact (127))
	Study design (for natural experiments, categorise using typology developed by Leatherdale (128))
	Theoretical framework and/or logic model underpinning evaluation (if described)
	Period of observation
	Variables of interest: Outcome measure(s) and change in measure(s) (+/-/=) for quantitative impact evaluations; measures or observed variables or concepts for other types of study
	Consideration of unintended consequences (Y/N)
	If yes, which unintended consequences? (e.g., economic outcomes, food security)
