

**Fig. S2 Cell proliferation results in -DOX/+DOX cells.** Total cell growth count in (A) -DOX and (B) +DOX cells. Each panel shows the total number of live cells over five days for a specific combination of palbociclib and fulvestrant. The concentration of fulvestrant increases across the columns and is denoted at the top of each column; the concentration of palbociclib increases down the rows and is denoted to the right of each row. The unit of drug concentrations is nanomolar (nM).
