

Fig. S3 Cell cycle analysis results. Distribution of cells in each phase of the cell cycle in (A) -DOX and (B) +DOX cells. The top row in each panel is from the fulvestrant alone treatment, the middle row shows the results from the palbociclib alone treatment, and the bottom row shows the results from the combination treatment. The percentage of cells in G0/G1 is shown in red, S is shown in blue, and G2/M is shown in green. The unit of drug concentrations is nM.
