

Table S2. Questions and response options used in survey instrument.

Questions	Response options
What is your main source of drinking water?	<input type="checkbox"/> Unfiltered tap water <input type="checkbox"/> Filtered tap water <input type="checkbox"/> Bottled/prepackaged water <input type="checkbox"/> Other
To your knowledge, has your primary source of drinking water been impacted by PFAS?	<input type="checkbox"/> Yes <input type="checkbox"/> No
How concerned are you about PFAS being in your drinking water?	<input type="checkbox"/> Not at all concerned <input type="checkbox"/> Slightly concerned <input type="checkbox"/> Moderately concerned <input type="checkbox"/> Very concerned <input type="checkbox"/> Extremely concerned
To your knowledge, has your community been exposed to PFAS?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not sure
How would you describe your knowledge about PFAS as an environmental contaminant?	<input type="checkbox"/> I've heard of it, and don't know what it is <input type="checkbox"/> I've heard of it or seen it somewhere, but don't know what it is <input type="checkbox"/> I think I know what it is <input type="checkbox"/> I'm confident I know what it is
What percentage of the U.S. population do you think has been exposed to PFAS?	Scale, 0-100
<p>* How familiar are you with the following items as potential sources of PFAS contamination?</p>	
Drinking water Public waterways near waste disposal sites Soils near waste disposal sites Dairy products Fresh produce Freshwater fish Seafood Food packaging Non-stick cookware Personal hygiene products Household products (fabrics, cleaning products, paints, and sealants) Fire extinguishing foams Fertilizers from wastewater treatment plants	<input type="checkbox"/> Not at all familiar <input type="checkbox"/> Slightly familiar <input type="checkbox"/> Moderately familiar <input type="checkbox"/> Very familiar <input type="checkbox"/> Extremely familiar

*** Please rate your intention to change your use of the following items because of their potential for PFAS contamination.**

Drinking water

Public waterways near waste disposal sites

Soils near waste disposal sites

Dairy products

Fresh produce

Freshwater fish

Seafood

Food packaging

Non-stick cookware

Personal hygiene products

Household products (fabrics, cleaning products, paints, and sealants)

Fire extinguishing foams

Fertilizers from wastewater treatment plants
