STROBE Statement—checklist of items that should be included in reports of observational studies

Background/rational 2 Explain the scientific background and rationale for the investigation being reported 3 Introduction Bethods Study design 4 Present key elements of study design early in the paper 5-6 Program Design section Setting 5 Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection Participants 6 (a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. 7-8 Measures section Measures section Measures section Measures section Measures section		Ite m		Page No.	Relevant text from manuscript
The provide in the abstract an informative and balanced summary of what was done and what was 1 Abstract found		No.			<u>. </u>
Found Foun	Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	1	Abstract
Background/rational 2 Explain the scientific background and rationale for the investigation being reported 3 Introduction			•	1	Abstract
e Objectives 3 State specific objectives, including any prespecified hypotheses 4 Introduction Methods Study design 4 Present key elements of study design early in the paper 5-6 Program Design section Setting 5 Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, 6-7 Inclusion Criteria section follow-up, and data collection Participants 6 (a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section (measurement). Describe comparability of assessment methods if there is more than one group	Introduction				
Methods Study design 4 Present key elements of study design early in the paper 5-6 Program Design section Setting 5 Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection 6-7 Inclusion Criteria section follow-up. Participants 6 (a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up. Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls. Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case Neasures section Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Study design 4 Present key elements of study design early in the paper 5-6 Program Design section Setting 5 Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection Participants 6 (a) Cohort study:—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study:—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study:—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study:—For matched studies, give matching criteria and number of exposed and unexposed Case-control study:—For matched studies, give matching criteria and the number of controls per case Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. 7-8 Measures section Give diagnostic criteria, if applicable Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section measurement (measurement). Describe comparability of assessment methods if there is more than one group	Objectives	3	State specific objectives, including any prespecified hypotheses	4	Introduction
Study design 4 Present key elements of study design early in the paper 5-6 Program Design section Setting 5 Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection Participants 6 (a) Cohort study:—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study:—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study:—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study:—For matched studies, give matching criteria and number of exposed and unexposed Case-control study:—For matched studies, give matching criteria and the number of controls per case Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. 7-8 Measures section Give diagnostic criteria, if applicable Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section measurement (measurement). Describe comparability of assessment methods if there is more than one group	Methods				
For each variables follow-up, and data collection Farticipants 6 (a) Cohort study—Give the eligibility criteria, and the sources and methods of selection of participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section Measures section Measures section		4	Present key elements of study design early in the paper	5-6	Program Design section
participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed Case-control study—For matched studies, give matching criteria and the number of controls per case Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section Measures section (measurement). Describe comparability of assessment methods if there is more than one group	Setting	5		6-7	Inclusion Criteria section
Variables 7 Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. 7-8 Measures section Give diagnostic criteria, if applicable Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section (measurement). Describe comparability of assessment methods if there is more than one group	Participants	6	participants. Describe methods of follow-up Case-control study—Give the eligibility criteria, and the sources and methods of case ascertainment and control selection. Give the rationale for the choice of cases and controls Cross-sectional study—Give the eligibility criteria, and the sources and methods of selection of participants (b) Cohort study—For matched studies, give matching criteria and number of exposed and unexposed	6-7	Inclusion Criteria section
Data sources/ 8* For each variable of interest, give sources of data and details of methods of assessment 7-8 Measures section measurement (measurement). Describe comparability of assessment methods if there is more than one group	Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers.	7-8	Measures section
		8*	For each variable of interest, give sources of data and details of methods of assessment	7-8	Measures section
		Q		6	Inclusion Critoria

Study size	10	Explain how the study size was arrived at	7	Inclusion Criteria
------------	----	---	---	--------------------

Continued on next page

Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why	7-9	Measures section
Statistical	12	(a) Describe all statistical methods, including those used to control for confounding	9-10	Statistical Analysis section
methods		(b) Describe any methods used to examine subgroups and interactions	NA	
		(c) Explain how missing data were addressed	7	Inclusion Criteria
		(d) Cohort study—If applicable, explain how loss to follow-up was addressed	NA	
		Case-control study—If applicable, explain how matching of cases and controls was addressed		
		Cross-sectional study—If applicable, describe analytical methods taking account of sampling strategy		
		(e) Describe any sensitivity analyses	NA	
Results				
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined	10	Participant Characteristics
		for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed		section
		(b) Give reasons for non-participation at each stage	6-7	Inclusion Criteria section
		(c) Consider use of a flow diagram	Figure 1	
Descriptive	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information on	10-11	Participant Characteristics
data		exposures and potential confounders		section
		(b) Indicate number of participants with missing data for each variable of interest		Participant Characteristics
				section
		(c) Cohort study—Summarise follow-up time (eg, average and total amount)	11	Overall Clinical Outcomes
Outcome data	15*	Cohort study—Report numbers of outcome events or summary measures over time	11-12,	Overall Clinical Outcomes
			Figure 2	
		Case-control study—Report numbers in each exposure category, or summary measures of exposure		
		Cross-sectional study—Report numbers of outcome events or summary measures		
Main results	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision	11-12	Overall Clinical Outcomes,
		(eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were		Workplace Outcomes
		included		
		(b) Report category boundaries when continuous variables were categorized	NA	
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period

Other analyses	17	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity	NA	
		analyses		
Discussion				
Key results	18	Summarise key results with reference to study objectives	12-13	Discussion section
Limitations	19	Discuss limitations of the study, taking into account sources of potential bias or imprecision.	14	Strengths & Limitations section
		Discuss both direction and magnitude of any potential bias		
Interpretation	20	Give a cautious overall interpretation of results considering objectives, limitations, multiplicity	14-15	Discussion, Strengths Limitations
		of analyses, results from similar studies, and other relevant evidence		
Generalisability	21	Discuss the generalisability (external validity) of the study results	14	Strengths and Limitations section
Other information				
Funding	22	Give the source of funding and the role of the funders for the present study and, if applicable,	NA	
		for the original study on which the present article is based		

^{*}Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

Note: An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
