

**Supplemental Table 1.** Comparison of composite events risk between patients divided into two groups by the median time to initiation of dapagliflozin after hospital admission (early initiation, i.e., by day 6, group E; late initiation, i.e., on day 7 or later, group L)

	Group E (n=63)	Group L (n=55)	P value
Composite events within 30 days, n (%)	1 (1.72)	0 (0)	0.26
Composite events within 90 days, n (%)	3 (5.17)	3 (6.12)	0.83

Composite events; all-cause death or rehospitalization for heart failure.
