
Supplemental Fig. 1. Percentage and numbers of recruited macrophages, resident alveolar macrophages (AM) and dendritic cells (DC) in lung and BAL from control and hyperglycemic (HG) mice instilled with 0.05 µg *K. pneumoniae* LPS (n=5-13). All experiments were repeated at least twice. Statistical differences were analyzed by Student's *t*-test, *$p < 0.05$, **$p < 0.001$, ***$p < 0.001$.
