

**Supplementary Table 1. An overview of the single morbidities with their definitions and the disease domains.**

<b>Infectious and parasitic diseases</b>	<b>Neoplasms</b>	<b>Diseases of the blood and blood-forming organs</b>
Use systemic antiinfectives  Systemic antiinfectives = ATC code J	Self-reported cancer (excluding non-melanoma skin cancer)	Anemia: - Self-reported <b>and</b> use of anti-anemic preparations <b>or</b> - Hemoglobin concentration <13 g/dl in men <b>or</b> - Hemoglobin concentration <12 g/dl in women  Bleeding disorder: - Self-reported <b>and</b> use of anti-thrombotic drugs <b>or</b> - Self-reported <b>and</b> use of anti-hemorrhagic drugs  Anti-anemic preparations = ATC code B03; anti-thrombotic drugs = ATC code B01AA, B01AB; anti-hemorrhagic drugs = ATC-code B02
<b>Endocrine, nutritional and metabolic diseases</b>	<b>Mental, behavioral and neurodevelopmental disorders</b>	<b>Diseases of the nervous system</b>
Diabetes: - Self-reported <b>or</b> - Use of oral blood-glucose lowering agents and/or insulin <b>or</b> - Fasting glucose levels $\geq 7.0$ mmol/L <b>or</b>	Depression: If MINI available: - Current depressive disorder <b>and</b> use of antidepressants - Dysthymic disorder <b>and</b> use of	Dementia / Alzheimer's disease: - Self-reported <b>or</b> - MMSE-score <24 if education level low/medium <b>and</b> age $\geq 65$ years <b>or</b> - MMSE-score <25 if education level high <b>and</b>

- Non-fasting glucose level  $\geq 11.1$  mmol/L

Hypercholesterolemia:

- Self-reported myocardial infarction **and** cholesterol  $\geq 5.0$  mmol/L **or**
- Use of lipid lowering medication **or**
- Cholesterol  $\geq 6.5$  mmol/L

Endocrine gland disorder:

- Use of hydrocortisone
- Use of somatropin/somatropin agonist
- Use of desmopressin

Insulin = ATC code A10A; oral blood-glucose lowering agents = ATC code A10B; lipid lowering medication = ATC C10A, C10B; hydrocortisone = ATC code H02AB09; somatropin/somatropin agonist = ATC code H01CB; desmopressin = ATC code H01BA02

### Diseases of the eye and adnexa

Cataract:

- Self-reported

Glaucoma:

- Use of antiglaucoma preparations

antidepressants

If MINI not available:

- Self-reported **and** use of antidepressants

Anxiety disorder:

If MINI available:

- Any anxiety disorder

If MINI not available:

- Self-reported

Schizophrenia:

- Self-reported

Attention-deficit/hyperactivity disorder (ADHD):

- Self-reported

Antidepressants = ATC-code N06A

### Diseases of the ear and mastoid process

Chronic sinusitis of throat and/or nose:

- Self-reported **and** use of local or systemic decongestive drugs

age  $\geq 65$  years

Migraine:

- Self-reported

Epilepsy:

- Self-reported **and** use of anti-epileptics

Back or neck hernia:

- Self-reported

Parkinson's disease:

- Self-reported **and** use of anti-Parkinson's drugs

Multiple sclerosis:

- Self-reported

Spasticity:

- Self-reported

Anti-epileptics = ATC-code N03; anti-Parkinson's drugs = ATC-code N04

### Diseases of the circulatory system

Hypertension:

- Blood pressure  $>140/90$  mmHg **or**
- Use of anti-hypertensive medication

Heart failure:

Severe limitations due to eyesight:  
- Self-reported

Antiglaucoma preparations = S01E

Severe hearing impairment

- Self-reported

Local or systemic decongestive drugs = ATC  
code R01

- Self-reported **and** use of (any) heart failure-  
related medication

- Self-reported heart transplant

- Self-reported pacemaker

Vascular disease:

- Self-reported myocardial infarction, stroke,  
PCI & CABG **and** use of vitamin K antagonists  
**or**

- Self-reported myocardial infarction, stroke,  
PCI & CABG **and** use of ascal/acetylsalicylic  
acid **or**

- Self-reported myocardial infarction, stroke,  
PCI & CABG **and** use of clopidogrel

Atrial fibrillation:

- Self-reported as 'diagnosed by a MD' **and**  
use of vitamin K antagonists **or**

- Self-reported pacemaker

Thrombosis:

- Self-reported **and** use of anti-thrombotic  
drugs

Lung emboli:

- Self-reported **and** use of anti-thrombotic  
drugs

Anti-hypertensive medication = ATC code  
C02, C03, C04, C07, C08, C09; heart failure-

### Diseases of the respiratory system

Asthma:

- Doctors diagnosed asthma **or**
- 2 or more self-reported symptoms of: wheeze, attacks at rest, woken by an attack **and** use of asthma /COPD medication **or**
- Self-reported asthma **and** use of asthma/COPD medication COPD

Chronic obstructive pulmonary disease (COPD):

- If spirometry available: GOLD classification: I-IV in ever smokers (current or ex) **or**
- If spirometry not available: self-reported COPD **and** use of asthma/COPD medication **and** age >40 in ever smokers (current or ex)

Chronic mucus hypersecretion/chronic bronchitis:

- Phlegm production during day or night,

### Diseases of the digestive system

Liver disease:

- Self-reported liver cirrhosis

Inflammatory bowel disease:

- Self-reported ulcerative colitis **or**
- Self-reported Morbus Crohn

Celiac disease:

- Self-reported

Gastric disease:

- Self-reported ulcer pepticum **and** use of H2-antagonists, prostaglandins, protonpumpinhibitors (PPI)

Irritable bowel syndrome:

- Self-reported

H2-antagonists, prostaglandins, protonpumpinhibitors = ATC code A02

related medication = ATC code C03, C07, C08, C09; vitamin K antagonists = ATC B01AA; ascal/acetylsalicylic acid = B01AC06, B01AC08; clopidogrel = B01AC04; anti-thrombotic drugs = ATC code B01AA, B01AB

### Diseases of the skin and subcutaneous tissue

Acne:

- Self-reported severe acne **and** use of acne suppressor

Eczema:

- Self-reported **and** use of emollients and/or dermatological corticosteroids

Psoriasis:

- Self-reported psoriasis **and** use of psoriasis suppressor

Acne suppressor = ATC code D10; Emollients and/or dermatological corticosteroids = ATC code D02; Psoriasis suppressor = ATC code D05

or immediately after waking up during at least 3 months/year

Asthma/COPD medication = ATC code R03

**Diseases of the musculoskeletal system and connective tissue**

Osteoarthritis:

- Self-reported **and** use of analgesics **or**
- Self-reported symptoms of pain in hands & feet **and** use of analgesics **or**
- Self-reported symptoms of joint stiffness **and** use of analgesics

Gout:

- Use of anti-gout medication

Osteoporosis:

- Self-reported **and** use of calci chew D3 **and** bisphosphonates **or**
- Self-reported **and** use of denosumab

Rheumatoid arthritis:

- Self-reported **and** use of NSAIDS/DMARDS/ biological/methotrexate **or**
- 2 or more self-reported symptoms of pain in hands & feet or joint stiffness **and** use of NSAIDS/DMARDS/ biological/methotrexate

**Diseases of the genitourinary system**

Chronic bladder infection:

- Self-reported **and** use of anti-microbial drugs

Benign prostatic hypertrophy:

- Use of benign prostatic hypertrophy-related drugs

Hysterectomy or surgical extirpation of 2 ovaries:

- Self-reported

Impaired renal function:

- eGFR  $\geq 60$  ml/min/1.73m<sup>2</sup> with albuminuria (>30 mg/24h) if available **or**
- eGFR <60 ml/min/1.73m<sup>2</sup> **or**
- Kidney transplant

Kidney stones:

- Self-reported

Anti-microbial drugs = ATC code G01; Benign prostatic hypertrophy-related drugs = ATC code G04C

Fibromyalgia:

- Self-reported

Hip fracture in last 12 months:

- Self-reported

Analgesics = ATC-code N02A, N02BE01, M01AB, M01AE; Anti-gout medication = ATC code M04; Calci Chew D3 = ATC code A12XA; Bisphosphonates = ATC code M05AB, M05BB; Denosumab = ATC code M05BX04; NSAIDS = ATC code M01AB, M01AE; DMARDS = ATC code M01; Biological = ATC code L04AB, L04AC, L04AA24, L01XC02; methotrexate = ATC code L01BA01

**Supplementary Table 2. The odds ratios for having a lower score than the (age- and sex-specific) 25th percentile cut-off per HRQoL dimension, according to affected disease domains.**

	Physical functioning		Social functioning		Physical role functioning		Emotional role functioning

--------------------------------------	------------------	------	------------------	-------	------------------	--------	------------------	------

The model included thyroid hormone use, body mass index, smoking status as covariates. CI, confidence interval; OR, odds ratio.

**SFigure 1. Forest plot demonstrating the odds ratios for having an affected disease domain according to thyroid hormone use and sex.** Logistic regression analyses included age as covariate. Circles indicate odds ratios for each cohort, with horizontal lines corresponding to 95% confidence intervals

**SFigure 2. Percentage of thyroid hormone users and non-users with an affected single morbidity.**

For benign prostatic hypertrophy the percentage of male thyroid hormone users and male non-users is shown, whereas for gynecologic surgery the percentage of female thyroid hormone users and female non-users is shown. ADHD, attention-deficit/hyperactivity disorder; COPD, chronic obstructive pulmonary disease.

**SFigure 3. Forest plot on a log scale demonstrating the odds ratios for having an affected single morbidity according to thyroid hormone use.** Logistic regression analyses included age and sex as covariates. Circles indicate odds ratios for each cohort, with horizontal lines corresponding to 95% confidence intervals. The analyses concerning benign prostatic hypertrophy and gynecologic surgery were performed for respectively males and females only.
