

Figure S11

Fig S11: ISRIB does not rescue from statin-mediated apoptotic sensitization in AML Cell Lines.

A. The statin sensitive AML cell lines, MOLM13 and OCI-AML3 (AML3) are not rescued with ISRIB, n = 1.

B. AML cell lines do not upregulate ATF4 in response to pitavastatin treatment. Similar results were observed in a second experiment using AML3 cells.
