

A.

B.

**Supplementary Figure S5: T-BET and PD-1 expression on the CD8+ T cells at the base line (related with the main figure 3).** PBMCs from six patients (four responders and two non-responders) were subjected to the FCM analysis. There were the similar trends to the CD4+ T cell population with enriched T-BET+ or T-BET+ PD-1+ cells (**A** and **B**) but there was no statistical significance (**B**). *ns*, not significant
