

Supplementary table 1. Conservation of *C. elegans* genes with human autism-associated genes

<i>C. elegans</i> gene	Human gene	SFARI rank	EAGLE score	~identity (%)
<i>nrx-1</i>	<i>NRXN1</i>	1	143.75	27
	<i>NRXN2</i>	1	7	24
	<i>NRXN3</i>	1	11.1	24
<i>nlg-1</i>	<i>NLGN3</i>	1	6.5	29
	<i>NLGN4X</i>	1	12	29
	<i>NLGN2</i>	1	3	27
	<i>NLGN4Y</i>	2	/	28
<i>glr-1</i>	<i>NLGN1</i>	2	/	28
	<i>GRIA2</i>	1	12	37
	<i>GRIA3</i>	S	/	37
<i>glr-2</i>	<i>GRIA1</i>	2	/	37
	<i>GRIA2</i>	1	12	37
	<i>GRIA3</i>	S	/	35
<i>avr-15</i>	<i>GRIA1</i>	2	/	37
	<i>GLRA2</i>	2	/	39
	<i>GABRA3</i>	S	/	32
	<i>GABRB2</i>	1	0.3	31
	<i>GABRB3</i>	1	/	32
	<i>GABRA4</i>	2	/	30

Note: Conservation identified from homology searches on flybase, ortholist2, and previous work (refs). SFARI rank and EAGLE score from SFARI gene. % identity from DIOPT comparison of amino acid sequences.

Supplementary Table 2. *C. elegans* strains by Figure

Figure	Figure reference	Strain identifier	Genotype	Source	injection concentration*
1	<i>npr-1</i>	MPH39	<i>him-8(e1489) IV; npr-1(ad609) X; otIs525[lim-6int4::gfp]</i>	Hart Lab

1

2 **Supplemental Figure 1. Confirming role for, expression, and localization, of NRX-1 in**
 3 **aggregation behavior**

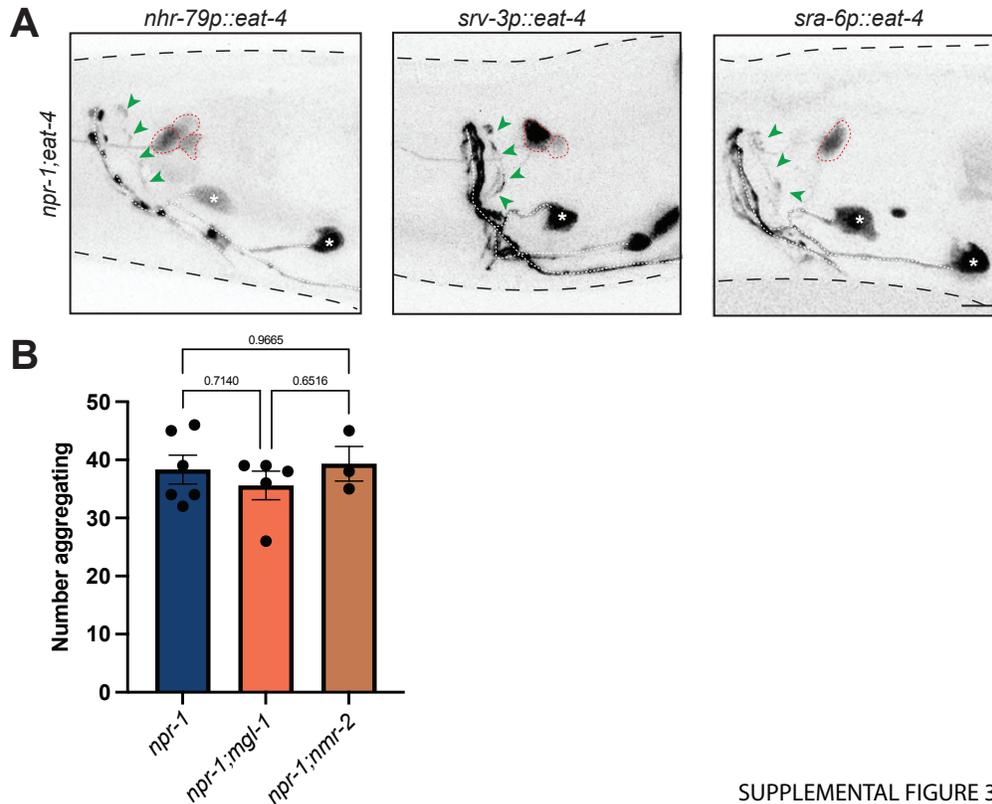

4 A) Graph showing aggregation behavior levels in *npr-1(ad609)* animals compared to *npr-*
 5 *1(ad609); otIs525;him-8* animals and N2 compared to *otIs525;him-8*. Aggregation behavior was

1 not changed by the presence of *otIs525* or *him-8*. Graph showing number of aggregating animals
 2 **(B)** and representative images **(C)** of QG1 (*qgIR1*) strain compared to *qgIR1;nrx-*
 3 *1(wy778);otIs525;him-8* mutants (Scale bar = 1mm). **D)** Graph showing number of aggregating
 4 animals in *npr-1(ad609)*, *npr-1(ad609);nrx-1(wy778)*, and *npr-1(ad609);nrx-1(wy778)* animals
 5 with NRX-1(γ) driven under the *ric-19* promoter and NRX-1(α) driven under promoters indicated.
 6 **E)** Expression of NRX-1 tagged with sfGFP driven under various promoters. Green arrows
 7 indicate NRX-1 axonal expression. Red dashed lines show cell bodies. White dashed line indicates
 8 *lim-6^{int4}::gfp* which drives expression in RIS and AVL axons. White asterisks indicate RIS and
 9 AVL cell bodies. Yellow box in *nlp-56p::nrx-1(α)* indicates area where RMG should be located.
 10 Expression of *nrx-1* under this promoter is not seen. *osm-6p::nrx-1(α)* imaging performed in *nrx-*
 11 *1(wy778)*(Scale bar = 10 μ m).

12
 13 **Supplemental Figure 2. Expression and localization of NLG-1 in aggregation behavior**
 14 **A)** Graph showing number of aggregating animals in *npr-1(ad609)*, *npr-1(ad609);nlg-1(ok259)*,
 15 and *npr-1(ad609);nlg-1(ok259)* with NLG-1 driven under *sra-6*, *srv-3*, and *ins-1* promoters. **B)**
 16 Expression of NLG-1 tagged with sfGFP driven under various promoters. Green arrows
 17 indicate NRX-1 axonal expression. Red dashed lines show cell bodies. White dashed line indicates

- 1 *lim-6^{int4}::gfp* which drives expression in RIS and AVL axons. White asterisks indicate RIS and
- 2 AVL cell bodies (Scale bar = 10 μ m).

SUPPLEMENTAL FIGURE 3

3

4 **Supplemental Figure 3. Expression of EAT-4 and analysis of glutamate receptors in**

5 **aggregation behavior**

6 **A)** Expression of EAT-4 tagged with sfGFP driven under *nhr-79p*, *srv-3p*, and *sra-6p* promoters.

7 Green arrows indicate NRX-1 axonal expression. Red dashed lines show cell bodies. White dashed

8 line indicates *lim-6^{int4}::gfp* which drives expression in RIS and AVL axons. White asterisks indicate

9 RIS and AVL cell bodies (Scale bar = 10 μ m). **B)** Graph showing number of aggregating animals

10 in *npr-1(ad609)*, *npr-1(ad609);mgl-1(tm1811)* and *npr-1(ad609);nmr-2(ok3324)*.
