

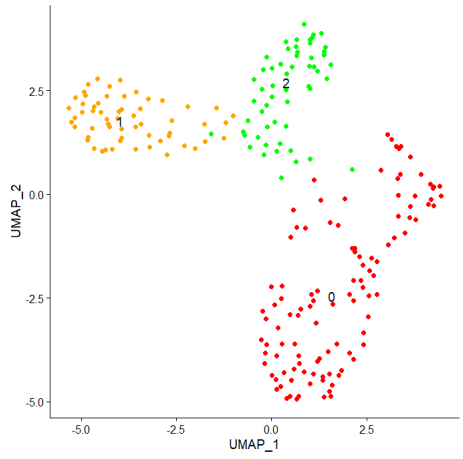

Figure S10:

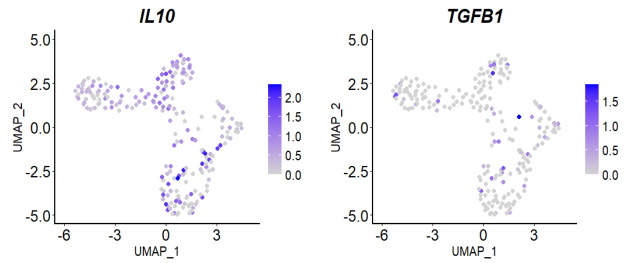

(A) UMAP plot of expression profile of myeloid cells from 18 HNSCC patients (GSE103322). Each dot represents a cell. UMAP is colored by cluster. Feature plot showing expression levels of (B) anti-inflammatory, (C) pro-inflammatory (D) M1 macrophages, and (E) M2 macrophage marker genes, across clusters. Each cell is denoted by a dot and the color intensity represents the gene expression level.
