

Appendix B. Structured categorisation matrix quality criteria

Code	Definition
<i>Performance</i>	The task on which the feedback is provided. This task must be observable.
<i>Judgment</i>	An adjective used to denote the gap between the performance and a standard. It is an evaluative statement expressed as a judgment on past performance.
<i>Elaboration</i>	Informative statement that builds further on the judgment expressed as a question, confirmation, suggestion, or justification... (e.g. it indicates what went well or did not go well, why it went well or not...). In doing so, it gives more details about the judgment.
<i>Improvement</i>	The aim of feedback is to improve the trainee's performance. The feedback must suggest strategies for improvement.
