

**Biochemistry.** In the article “The effects of sequence context on DNA curvature” by Mensur Dlakić and Rodney E. Harrington, which appeared in number 9, April 30, 1996, of *Proc. Natl. Acad. Sci. USA* (93, 3847–3852), the authors request that the following be noted. In Fig. 2, on the abscissa, the fifth base from the left should be an “a” instead of a “t.” The correct figure and its legend are shown below.

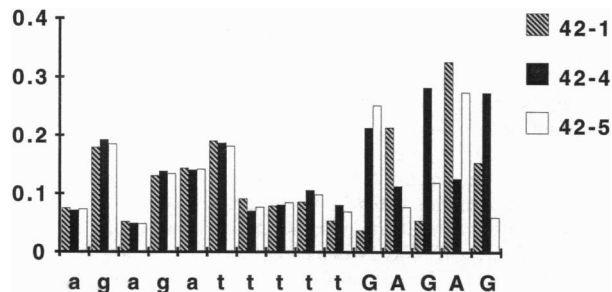

FIG. 2. Cutting frequencies for complementary strands of sequences 42-1, 42-4, and 42-5 (Fig. 1A) with DNase I. The GAGAG motif, where most of the differences are observed, is shown in capitals.

**Physiology.** In the article “Spectrum of HERG K<sup>+</sup>-channel dysfunction in an inherited cardiac arrhythmia” by Michael C. Sanguinetti, Mark E. Curran, Peter S. Spector, and Mark T. Keating, which appeared in number 5, March 5, 1996, of *Proc. Natl. Acad. Sci. USA* (93, 2208–2212), the authors request that the following be noted. Reference 11 should read:

11. Liman, E. R., Hess, P., Weaver, F. & Koren, G. (1991) *Nature (London)* 353, 752–756.

**Biochemistry.** In the article “A functional peptide encoded in the *Escherichia coli* 23S rRNA” by Tanel Tenson, Alexandra DeBlasio, and Alexander Mankin, which appeared in number 11, May 28, 1996, of *Proc. Natl. Acad. Sci. USA* (93, 5641–5646), the authors request that the following be noted. The first sentence of *Results* should read “Phenotypic selection of the random gene fragment libraries was originally described by Holzmayr *et al.* (18).”

**Immunology.** In the article “A synthetic random basic copolymer with promiscuous binding to class II major histocompatibility complex molecules inhibits T-cell proliferative responses to major and minor histocompatibility antigens *in vitro* and confers capacity to prevent murine graft-versus-host disease *in vivo*,” by Paul G. Schlegel, Rina Aharoni, Yanfei Chen, Jun Chen, Dvora Teitelbaum; Ruth Arnon, Michael Sela, and Nelson J. Chao, which appeared in number 10, May 14, 1996, of *Proc. Natl. Acad. Sci. USA* (93, 5061–5066), the authors request that the following corrections be noted: In the Abstract, line 6, and in Materials and Methods, p. 5062, line 17, of the left hand column, inadvertently the ratio of two amino acids within GLAT has been reversed. It should read: 1.9:4.7:6.0:1.0. In the Abstract, line 6, a printer’s error resulted in the incorrect molecular weight range of GLAT. It should be changed to  $M_r$ , 6000–8500.

**Psychology.** Regarding the article “Electroconvulsive shock and lidocaine reveal rapid consolidation of spatial working memory in the water maze” by Véronique Bohbot, Pavel Otáhal, Zheng Liu, Lynn Nadel, and Jan Bures, which appeared in number 9, April 30, 1996, of *Proc. Natl. Acad. Sci. USA* (93, 4016–4019), it is requested that the following correction be noted. This article, which was listed in the Table of Contents under the heading of Plant Biology, should have been listed under the heading of Psychology.
