

Table SI. Correlation analysis between PC28 and other variables by Spearman's rank correlation coefficient.

Variable	r	P-value
Age	-0.116	0.169
Sex	-0.002	0.981
Hemoglobin level	-0.258	0.002
Platelet counts	-0.623	<0.001
WBC	-0.107	0.202
ANC	-0.138	0.100
Blast in bone marrow	-0.025	0.763
Cytogenetic risk according to IPSS-R	0.101	0.231
RCC28	0.583	<0.001
ANC29	-0.281	<0.001
RDI-AZA1	-0.079	0.349

ANC, absolute neutrophil counts; IPSS-R, Revised International Prognostic Scoring System; PC, platelet concentrate; RCC, red cell concentrates; RDI-AZA1, relative dose intensity in the first cycle of azacitidine treatment; WBC, white blood cells.
