Figure S10. Cellular LPS level in spheroplasts and LpxC overexpressing strains.

150 The cellular LPS level in spheroplasts (**A**) or LpxC overexpressing strains (**B**) harbouring empty plasmid,

151 MCR-1 or M6 were determined by western blot. Error bars indicate standard errors of the means (SEM)

152 for triple biological replicates. A two-tailed unpaired *t* test was performed to determine the statistical

153 significance of the data. *, $P < 0.1$; **, $P < 0.01$; ***, $P < 0.001$. The bar graph was visualized with Prism

154 9 software. The raw data underlying this Figure can be found in S1_data.
