

Fig. S1. Tubb4 immunostaining intensity along proximal-distal position of cilia

Quantification of Tubb4 immunostaining intensity along the proximal to distal length of respiratory MCC cilia. Fluorescent intensity average is depicted as a black line with one standard deviation displayed in gray.

Fig. S2. RT-PCR of *Tubb4b* in mutants

(A) RT-PCR of *Tubb4b* homozygous mutant embryos and WT littermates using *Tubb4b* specific primers. Amplification of the predicted 1160 bp amplicon of *Tubb4b* was observed in the two control embryos but no bands were amplified from the two homozygous mutant embryos. (B) RT-PCR of identical *Tubb4b* homozygous mutant embryos and WT littermates using *Tubb5* specific primers. Amplification of the predicted 96 bp amplicon of *Tubb5* was observed in both control and *Tubb4b* embryos.

Fig. S3. Cilia measurements of *Tubb4b* mutant MCC in adult animals

Length of cilia in respiratory MCC in WT respiratory MCC ($5.95 \pm 1.04 \mu\text{m}$, $n=237$ cilia from 79 MCC) and in *Tubb4b KO* ($0.96 \pm 0.29 \mu\text{m}$, $n=267$ cilia from 89 MCC) as determined by Arl13b immunostaining. At least 25 cells from 3 animals/genotype were analyzed. **** $p < 0.0001$ unpaired t-test. All animals were age >P21.

Fig. S4. *Tubb4a*KO respiratory epithelium. Immunofluorescence staining of (A) WT and (B) *Tubb4a*KO respiratory epithelium at P1. Scale=5 μ m. Immunofluorescence staining of (C) WT and (D) *Tubb4a*KO oviduct epithelium (adult). Scale=5 μ m.

Fig. S5. *Tubb4b*KO retinal analysis. H&E staining of (A) WT retina (agouti animal) and (B) *Tubb4b* KO retina (albino animal) at P15. Scale=50µm. RPE=Retinal Pigmented Epithelium, RCC=Rod and Cone cells, ONL=Outer Nuclear Layer, INL=Inner Nuclear Layer, GCL=Ganglion Cell Layer.

Table S1. Genotypes of *Tubb4b* animals in litters at different ages

Numbers of animals of WT, heterozygous *Tubb4b* and homozygous *Tubb4b* animals at postnatal ages P0-P3 (14 litters), P4-P6 (9 litters), P7-P10 (18 litters).

| Litter age | WT | Het | Mut |
|------------|----|-----|-----|
| P0-P3 | 29 | 43 | 23 |
| P4-P6 | 21 | 25 | 7 |
| P7-P10 | 24 | 50 | 9 |
