

Figure S1. Identification of $\Delta\text{sar}X$ and $\Delta\text{sar}X\text{-C}$ strains.(A) Schematic model of construction of $\Delta\text{sar}X$ and $\Delta\text{sar}X\text{-C}$. (B) PCR identification of $\Delta\text{sar}X$ and $\Delta\text{sar}X\text{-C}$. M: DNA marker; 1: WT; 2: $\Delta\text{sar}X$; 3: $\Delta\text{sar}X\text{-C}$. (C) DNA sequencing result for the validation of $\Delta\text{sar}X$.
