

**Supplementary Table 1 Questions on variables related to hormonal and reproductive factors.**

| Variable  | Original question  | Field ID |
|---|--|----------|
| Age at menarche   | How old were you when your periods started?                                  | 2714     |
| Number of live births                                       | How many children have you given birth to? (Please include live births only) | 2734     |
| Ever had stillbirth, spontaneous miscarriage or termination | Have you ever had any stillbirths, spontaneous miscarriages or terminations? | 2774     |
| Had menopause   | Have you had your menopause (periods stopped)                                | 2724     |
| Age at menopause  | How old were you when your periods stopped?                                  | 3581     |
| Ever had hysterectomy                                       | Have you had a hysterectomy (womb removed)?                                  | 3591     |
| Bilateral oophorectomy                                      | Have you had both ovaries removed  | 2834     |
| Ever taken oral contraceptive pill                          | Have you ever taken the contraceptive pill? (include the 'mini-pill')        | 2784     |
| Age started oral contraceptive pill                         | About how old were you when you first went on the contraceptive pill?        | 2794     |
| Age when last used oral contraceptive pill                  | How old were you when you last used the contraceptive pill?                  | 2804     |
| Ever used hormone-replacement therapy (HRT)                 | Have you ever used hormone replacement therapy (HRT)?                        | 2814     |
| Age started hormone-replacement therapy (HRT)               | How old were you when you first used HRT?                                    | 3536     |
| Age last used hormone-replacement therapy (HRT)             | How old were you when you last used HRT?                                     | 3546     |

**Supplementary Table 2 Hazard ratios for comparing individual and combined associations between hormonal and reproductive factors and the risk of rheumatoid arthritis.**

| Characteristics                           | Total population<br>(n=190574) | Number Incidence cases<br>(n=2622) | Model 1          |                  | Model 2          |                  | Model 3          |                  |
|---|--------------------------------|------------------------------------|------------------|------------------|------------------|------------------|------------------|------------------|
|   |                                |                                    | HR (95%CI)       | P Value          | HR (95%CI)       | P Value          | HR (95%CI)       | P Value          |

Model 1: adjusted for age.

Model 2: Adjusted for age, Townsend deprivation index, ethnicity, smoking status, alcohol drinker status, body mass index, physical activity, vitamin D supplement, fracture history, diabetes, systolic blood pressure, diastolic blood pressure.

Model 3: Adjusted for age, Townsend deprivation index, ethnicity, smoking status, alcohol use, body mass index, physical activity, vitamin D supplement, fracture history, diabetes, systolic blood pressure, diastolic blood pressure, age at menarche, pregnant, menopause, history of hysterectomy, history of oophorectomy, contraceptive pill use, HRT use.

HR: Hazard ratio; CI: Confidence interval; HRT: Hormone replacement therapy.

**Supplementary Table 3 Associations between hormonal and reproductive factors and the risk of rheumatoid arthritis after excluding those who were diagnosed with rheumatoid arthritis for two years.**

| Characteristics                | Total population<br>(n=223054) | Number<br>Incidence cases<br>(n=2841) | Model 1          |                  | Model 2          |                  |

Adjusted for age, Townsend deprivation index, ethnicity, smoking status, alcohol drinker status, body mass index, physical activity, vitamin D supplement, fracture history, diabetes, systolic blood pressure, diastolic blood pressure.

HR: Hazard ratio; CI: Confidence interval; HRT: Hormone replacement therapy; BMI: body mass index.

<sup>a</sup> Early menarche was defined as age at first menstrual period before the age of 12 years.

<sup>b</sup> Early menopause was defined as the permanent absence of menstrual periods before the age of 45 years.
