

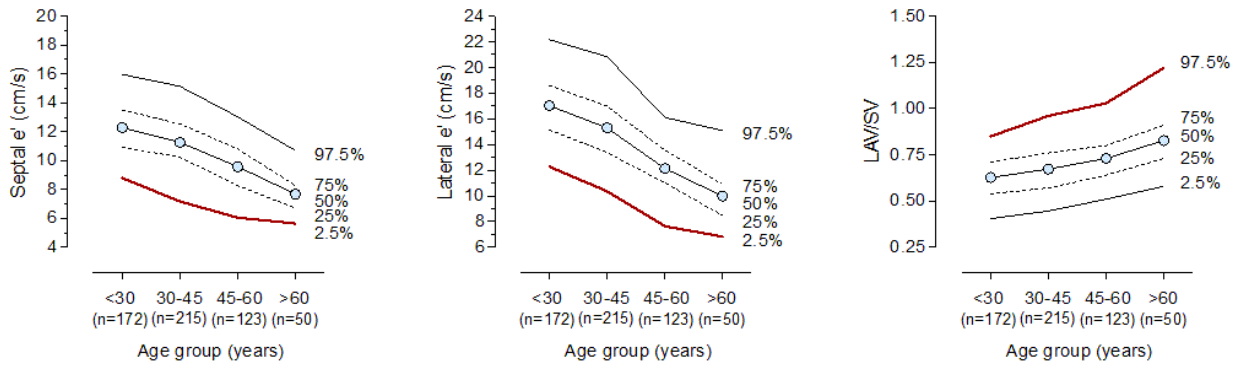

Figure S2. Age-specific percentiles of diastolic function indexes from 560 healthy references. The red line represents low-risk reference cut-offs for reference limits.

Healthy reference cut-off	Age group			
	<30 yrs (n=172)	30-45 yrs (n=215)	45-60 yrs (n=123)	>60 yrs (n=50)
<i>2.5th percentile</i>				
Septal e' (cm/s)	8.8	7.2	6.0	5.6
Lateral e' (cm/s)	12.3	10.4	7.6	6.8
<i>97.5th percentile</i>				
LA volume / SV	0.82	0.96	0.97	1.20

LAV, left atrial volume; SV, stroke volume.
