Search strategy

Research questions:

For the systematic review: *to identify and characterize the integrated community care interventions delivered by public health care and social care systems as well as outcomes related.*

For the realistic synthesis: How, why, for whom, and in what contexts do ICCs deployed by the public health and social care work and produce outcomes?

Population: all or major groups of the population (e.g., seniors, families, residents of social housing complexes) that is home to vulnerable or marginalized populations (material or social disadvantages) within specific local areas

Intervention: Localized community-based health care, Localized community-based social care, or both integrated at the local area level

Comparator: Not applicable

Outcomes: Improved health and well-being of individuals and communities, improved health equity, improved community social capital, social networks, social cohesion, participation in co-production, improved accessibility, availability, and continuity of health care and social care, action on social determinants of health

Setting: Public providers and local area

Study design: Not applicable

Cairn

Due to the limited computing power of the Cairn database, we had to run four queries and limit ourselves to the use of one concept (Interventions and Community Care). The results were then merged in Endnote and common duplicates between the four queries were removed.
