APPENDIX S6. Tanglegrams comparing the relationships between a pruned-down version of the Moore-Pollard and Mandel (2023a) tree now containing the 19 taxa used in this study, compared to the Compositae-1061 (A) and Compositae-Para-Loss-1272 (B) trees generated in this study. Lines between the taxa at the tips compare relationships: solid lines indicate the same relationships; dashed lines indicate differing relationships.

ned	Compositae-ParaLoss-1272
	—Roldana gilgii ·····
	—Emilia fosbergii ······
	—Packera loratifolia······
	Packera glabella
	—Packera porteri
	Packera pseudaurea ······•
	Packera aurea
	Packera dubia······
	—Packera streptanthifolia
	Packera greenei · · · · · · · · · · · · · · · · · · ·
	, Packera cana
	- – Packera castoreus
	∼ Packera crocata······•
·····	, Packera musiniensis ······•
	∼ ~Packera layneae ·······•
	∼Packera texensis ······•
	∼Packera franciscana ·····•
	—Packera candidissima·····•
	—Packera cynthioides
