

Questions regarding the medication diary

The medication diary was pilot tested by patients as part of a larger prospective descriptive study on the feasibility and validity of different methods measuring medication adherence. In this supplementary file, only questions regarding the evaluation of the format, content and user-friendliness of the medication diary are displayed.

1. How went the completion of the self-reported medication diary? Please indicate the extent to which you agree with the statements below.

	Strongly disagree	Disagree	Agree	Strongly agree
I reported every problem I encountered with my medication in the diary.				
Filling out the diary was easy.				
Filling out the diary was no effort at all.				
I would prefer to keep a digital diary.				
The diary can help me discuss medication-related problems with the home care nurse, GP or other healthcare provider.				

2. In your opinion, should anything be changed in the diary to make the diary more user-friendly?

No

Yes, namely:

Smaller size

Larger size

Smaller font

Larger font

More structure

Less structure

More space for free text notes

Other:

3. In your opinion, should anything be added to the medication diary?

No
