Modeling Molecular Pathogenesis of Idiopathic Pulmonary Fibrosis-Associated Lung Cancer in Mice

Barravecchia et al.

## Supplemental Figure S3

**Supplemental Figure S3: PCA biplot (PC1 and PC2) of VST-normalized gene counts for the top 500 most variable genes.** Individual samples are labeled. Groups are represented by shape (control: circle; IPF: square; LC: diamond; IPF-LC: triangle). Replicates are represented by color (1: yellow; 2: orange; 3: blue).
