

# **SUPPLEMENTAL MATERIAL**

**Table S1. Comparison of patient and event characteristics in cases where recording was and was not available for review.**

	No Recording Available (n=41)	Recording Available (n=185)	
Age in years, median (IQR)	1 (5)	1 (11)	
Female, % (n)	34% (14)	41% (75)	p=0.45
Witnessed, % (n)	24% (10)	34% (63)	p=0.23
Bystander CPR performed <sup>†</sup> , % (n)	63% (26)	82% (152)	p=0.01
Initial rhythm shockable, % (n)	2% (1)	9% (16)	p=0.17
Noncardiac etiology, % (n)	83% (34)	71% (132)	p=0.13
Outcomes at hospital discharge, % (n)			
Survived	15% (6)	14% (25)	p=0.85
CPC 1-2	7% (3)	12% (22)	p=0.40

CPC= Cerebral Performance Category

<sup>†</sup>Bystander CPR status relies solely on the EMS report when the 9-1-1 recording is not available.
