

Data Sharing Statement

Data

Data available: No

Additional Information

Explanation for why data not available: Data are not available immediately. The US Monitoring the Future makes data publicly available; however, there is usually a 18 month lag between data collection and making the data publicly downloadable. Because the data are currently restricted until then, there will be a delay. If a specific request for the data is made before then, requests to the second author who is the Director the Monitoring the Future Study should be made.
