

Filters applied	Definition
Q.Value	Run-specific precursor q-value
Lib.Q.Value	q-value for the respective library entry, 'global' if the library was created by DIA-NN. In case of MBR, this applies to the library created after the first MBR pass
Lib.PG.Q.Value	only relevant for MBR: global q-value for the protein group calculated after the first MBR pass
PG.Q.Value	run-specific q-value for the protein group
