

Data Sharing Statement

Article Info	https://dx.doi.org/10.21037/tlcr-23-804	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The survival data to be shared will include information on RTK expression levels and <i>EML4-ALK</i> fusion variants, upon reasonable request.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan will be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Data availability will extend for two years from the publication date, as the technique or survival data may be subject to updates during this timeframe.
7	To whom will you share the data?	We will share the data with medical oncologists and biomedical researchers.
8	For what type of analysis or purpose?	The data will be shared for analysis aimed at investigating the prognostic role of HER3 overexpression in non-small cell lung cancer.
9	How or where can the data/documents be obtained?	To obtain the data or documents, please send emails to the corresponding author at the following address: jenec@amc.seoul.kr
10	Any other restrictions?	There may be a consideration of potential benefits and risks for each request, and the data that can be shared will be determined after such an evaluation.
