

Supplementary Table 1. Simple linear regression analysis of anthropometric measurements

	Height vs. Weight	Weight vs. BMI
Men		
Younger	0.384 ^{a)}	0.891 ^{a)}
Elder	0.563 ^{a)}	0.855 ^{a)}
Women		
Younger	0.307 ^{a)}	0.888 ^{a)}
Elder	0.371 ^{a)}	0.869 ^{a)}

Values are Pearson's correlation coefficient.

^{a)} $P < 0.01$.

BMI, body mass index.
