

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Differentially expressed genes in CMV-infected cerebral organoids relative to mock.

File name: Supplementary Data 2

Description: Significantly over-represented GO terms in DEGs in CMV-infected cerebral organoids relative to mock.

File name: Supplementary Data 3

Description: KEGG pathways over-represented in CMV-infected organoids relative to mock.

File name: Supplementary Data 4

Description: Differentially expressed genes in CMV-infected cerebral organoids relative to mock in DYRK and SHH pathways.

File name: Supplementary Data 5

Description: Overlapping differentially expressed genes with SFARI database.

File name: Supplementary Data 6

Description: Disease enrichment differentially expressed gene dataset using the DisGeNET database.
