

For Figure 5 C (most blots were cut prior to staining in order to stain for multiple proteins) :

SIRT1

DIO2

PGC-1α

FGF21

MFN2

β-actin

UCP1

SIRT5

For Figure 5 F (most blots were cut prior to staining in order to stain for multiple proteins) :

Acetylation

Succinylation

Methyalmalonylation

Propionylation

**For Supplemental Figure 5 A  
(most blots were cut prior to staining in order to stain for multiple proteins) :**

**For Supplemental Figure 5 B  
(most blots were cut prior to staining in order to stain for multiple proteins) :**

**For Supplemental Figure 5 C  
(most blots were cut prior to  
staining in order to stain for  
multiple proteins) :**

**For Supplemental Figure 5 D  
(most blots were cut prior to  
staining in order to stain for  
multiple proteins) :**
