

A

## Alphaproteobacteria community 0.5 m

B

## Alphaproteobacteria community 2 m

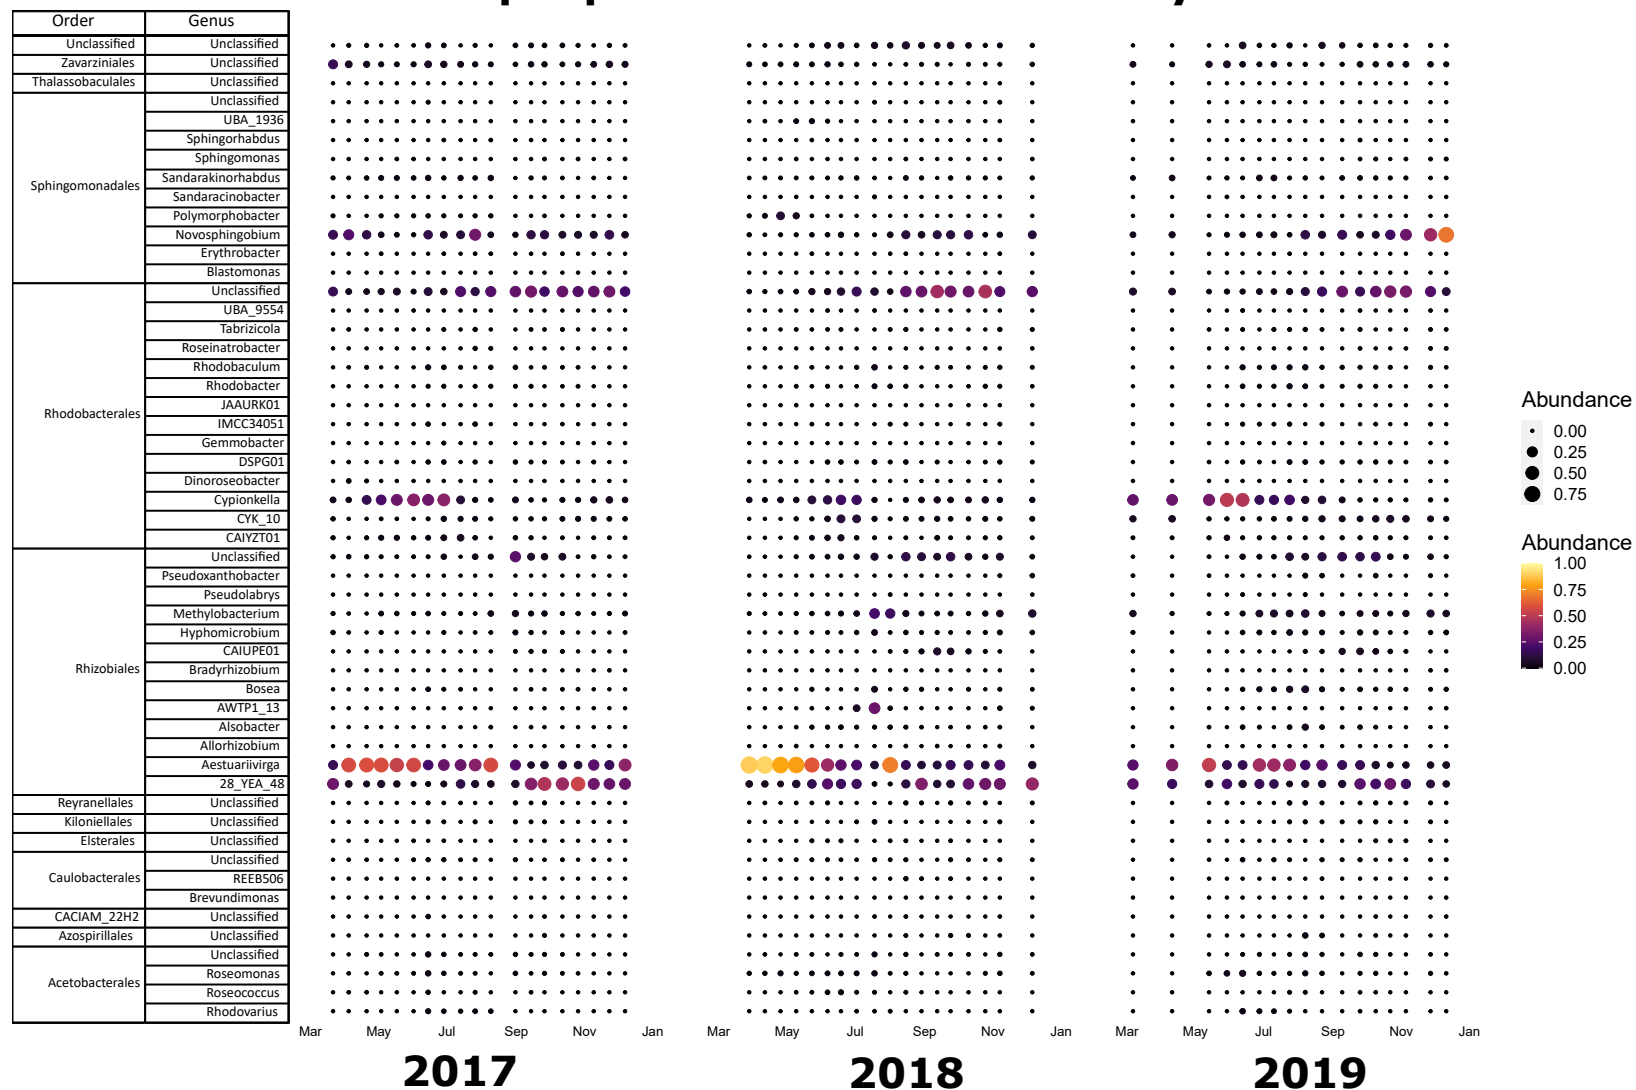

C

## Alphaproteobacteria community 5 m

D

## Alphaproteobacteria community 8 m

Supplementary Figure S2: Alphaproteobacteria community composition at order and genus level for 3-year sampling at 0,5 (A), 2 (B), 5 (C) and 8 m depth (D). Larger size and brighter colours are directly proportional to the relative contribution of each genus to the total Alphaproteobacteria community.
