

Gammaproteobacteria community 0.5 m

A

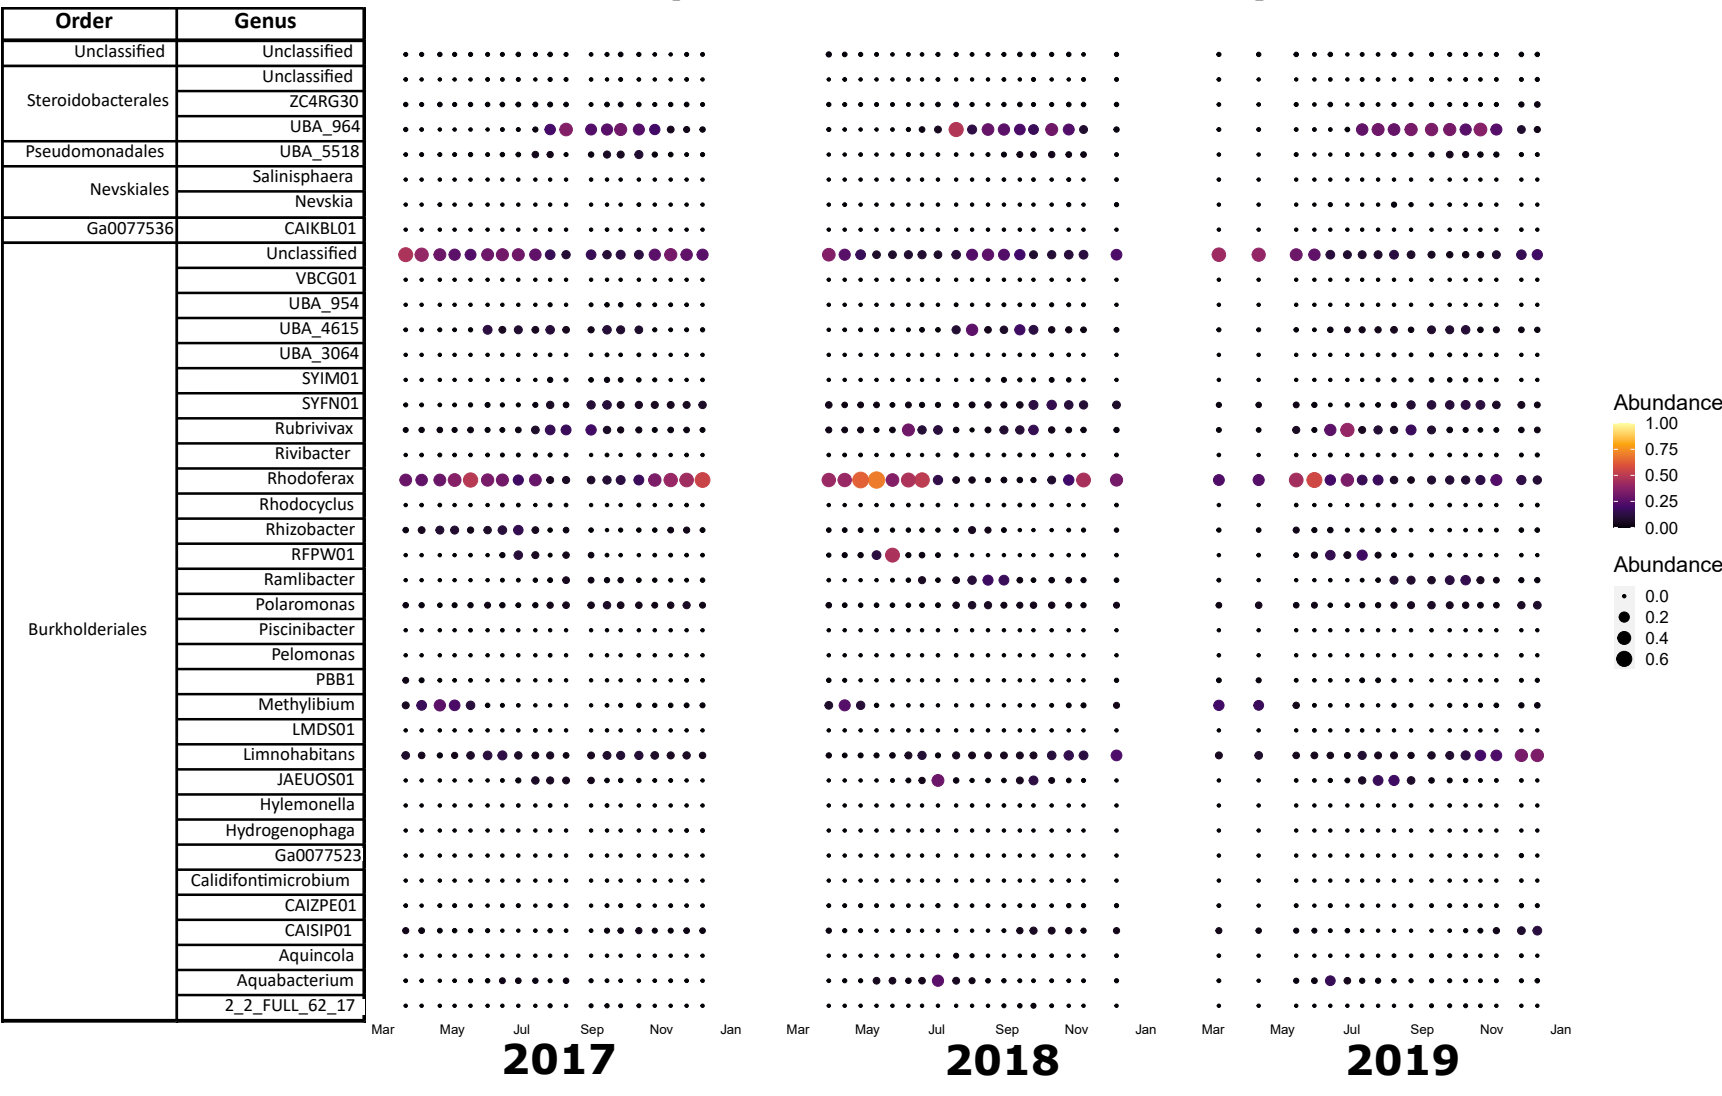

Gammaproteobacteria community 2 m

B

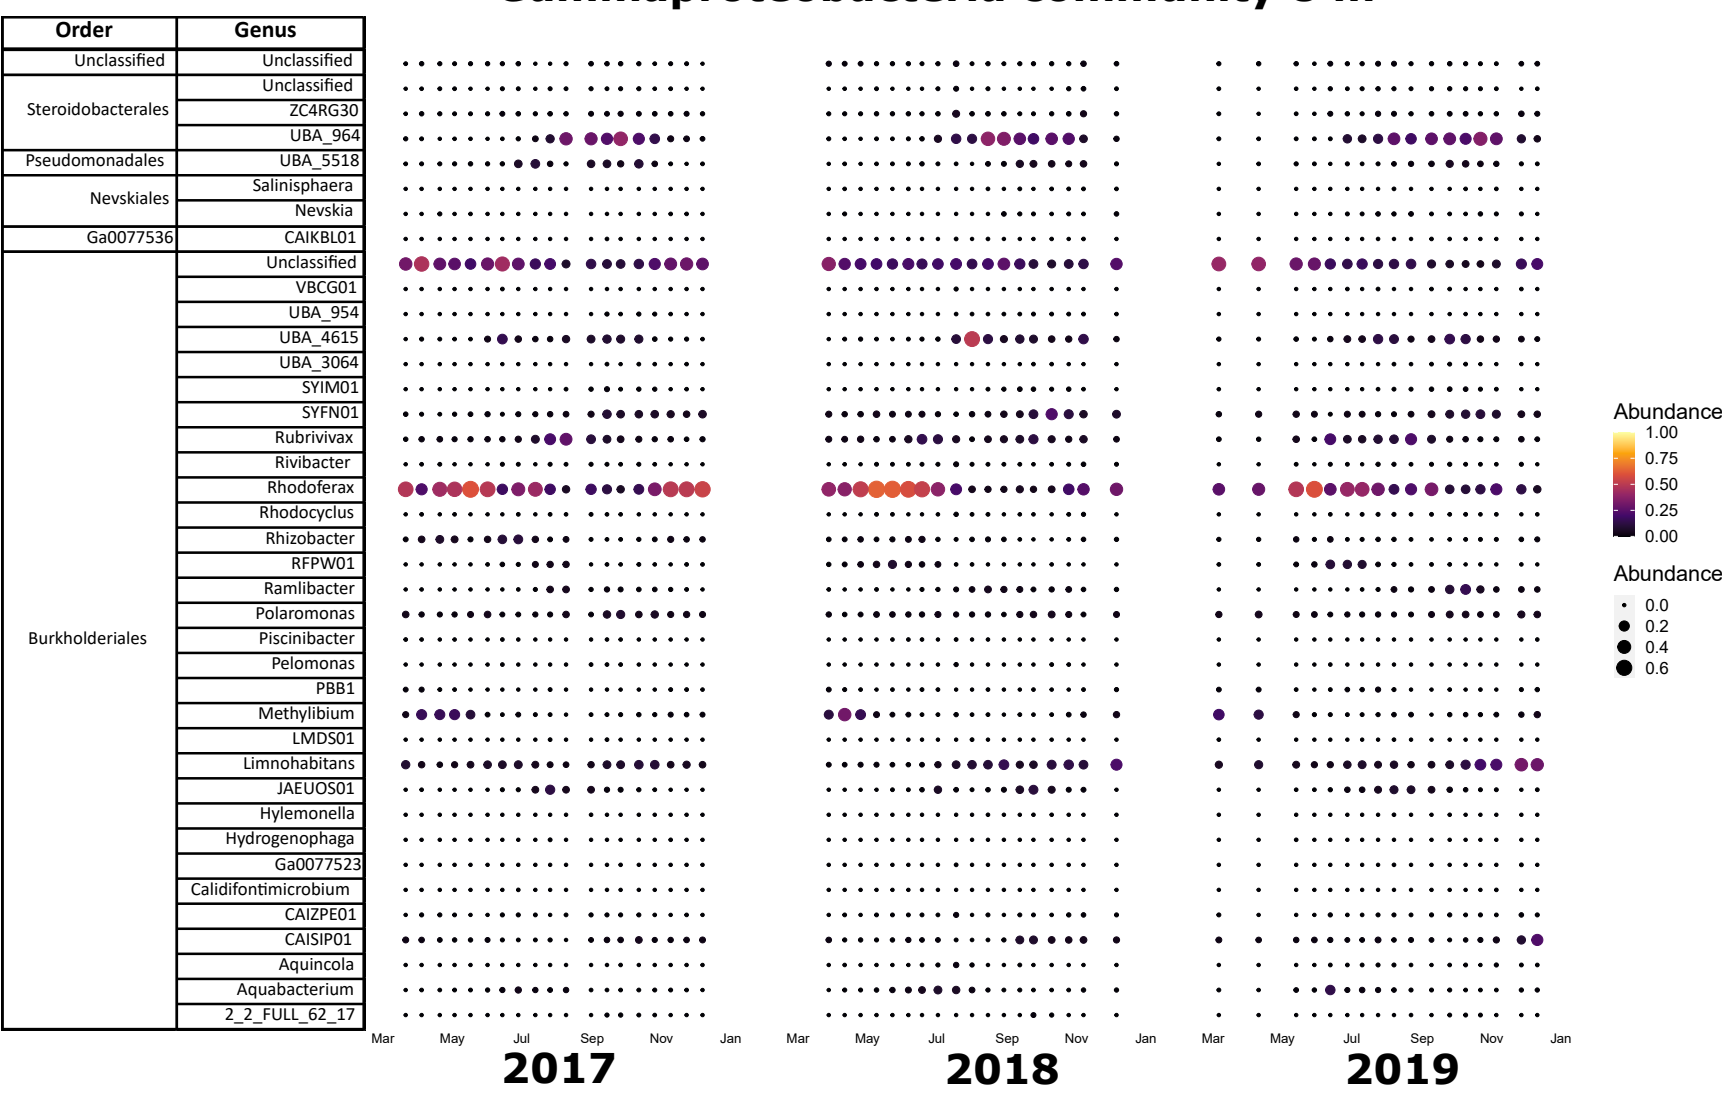

Gammaproteobacteria community 5 m

C

Gammaproteobacteria community 8 m

D

Supplementary Figure S3: Gammaproteobacteria community composition at order and genus level for 3-year sampling at 0.5 (A), 2 (B), 5 (C) and 8 m depth (D). Larger size and brighter colours are directly proportional to the relative contribution of each genus to the total Gammaproteobacteria community
