Geographic Disparities in Domestic Pig Population Exposure to Ebola Viruses, Guinea, 2017–2019

Appendix

Appendix Figure. Sample collection of pig serum from 2017–2019 in various natural regions of Guinea. The pigs sampling came from a large livestock animal collection consisting of 6 campaigns performed between 2017 and 2019 as following: the capital, Conakry, the middle maritime region in yellow and orange, the lower maritime region and the near hinterland in red, the upper maritime region in blue, and the forest region in green.
