

Supplementary Figure 10. A. *In vitro* stability of [^{89}Zr]Zr-DFO-L111 antibodies that were either freshly conjugated with DFO or thawed from -80°C after DFO conjugation. The stability was assessed in human serum by instant thin-layer chromatography. **B.** *In vitro* serum stability of [^{89}Zr]Zr-DFO-L111 antibodies in four different buffers. The stability was assessed in human serum by instant thin layer chromatography.
