Supplementary Table 2. Study inclusion and exclusion criteria

Included studies	
Qualitative studies	Randomized controlled trials, controlled before and after studies, interrupted time series analyses, prospective or retrospective cohort studies, case-control studies, and cross-sectional studies that explain any kind of intervention that pertains to cascade genetic testing and testing uptake
Qualitative studies	Individual interviews, focus group discussions, ethnographic interviews and participant observation, which investigated the implementation of interventions related to genetic screening and testing or which documented people's experiences with those interventions
Mixed methods studies	Interaction of process and implementation factors with engagement in cascade genetic testing uptake
Excluded studies	
Reviews	Literature reviews, scoping reviews and systematic reviews
Others	Non-peer reviewed publications, conference abstracts, editorials, and opinion pieces.
Other languages	Non-English publications
