Supplementary Tables

Supplementary Table 1: A detailed list of co-occurring phrases before/after IDU keywords along with the parsing rules, targeted pattern type, and examples of answers before and after parsing. Abbreviations: IDU, Injection Drug Use; h/o, history of; ivdu, intravenous drug use; hx, history; pmh, past medical history; hpi, history of present illness; sud, substance use disorder; oud, opioid use disorder.

Targeted	Co-occurring Phrases	Parsing Rules	Example Answers Before
Patterns	Before/After IDU		and After Parsing
	Keywords		_
Negations (nullifying the existence of IDU/skin popping/track marks/needle sharing)	Negation Phrases (NP): den(ying/ies/ied), no, never	Sentence: <text before="" np=""> NP <text after="" containing="" keywords="" np=""> Rule: NP <text after="" containing="" keywords="" np=""></text></text></text>	Before: 65y/o m w cardiac procedures, or recent surgical procedures, admits to drinking alcohol daily for the past 10 years, denies any history of ivdu After: denies any history of ivdu
Temporal information (active/ historical/last/frequency of use)	Temporal Phrases (TemP): past/remote/distant/prior/ previous/former/active/ current/recent/last/long history/hx (or h/o), daily, occasional, past, remote, distant, prior, previous, for- mer, active, current, recent, last, long, intermittent, hpi, history, hx, h/o, pmh	Sentence: <text before="" temp=""> <u>TemP</u> <text after="" containing="" keywords="" temp=""> Rule: <u>TemP</u> <text after="" containing="" keywords="" temp=""></text></text></text>	Before: pt smokes cannabis, has a h/o ivdu but none now, went to rehab 2070 After: h/o ivdu but none now, went to rehab 2070
Additional temporal information	Additional Temporal Phrases (ATP): year(s)/yr(s)/month(s)/ mnth(s)/day(s)/d/wk/wks/ mos ago	Sentence: <temp> <text after="" and="" atp="" before="" containing="" keywords="" temp=""> ATP <text after="" atp=""> Rule: <temp> <text after="" and="" atp="" before="" containing="" keywords="" temp=""> ATP</text></temp></text></text></temp>	Before: last ivdu was 10 days ago, snorts cocaine occasionally After: last ivdu was 10 days ago
Opioid/substance use disorder specific to IDU	Phrases related to Substance use disorder (SP): substance/polysubstance use/abuse disorder, sud, psud, oud, polysubstance, opioid use disorder, opioid, opiate	Sentence: <text before<br="">SP> <u>SP</u> <text after="" con-<br="" sp="">taining keywords> Rule: <u>SP</u> <text after="" sp<br="">containing keywords></text></text></text>	Before: 200m w niddm, htn, bipolar disorder and <u>oud</u> (iv heroin) on methadone maintenance, recent heroin relapse After: <u>oud</u> (iv heroin) on methadone maintenance, recent heroin relapse
Status of track marks	Phrases related to Track Mark status (TMP): arm(s)/abnormal/multiple/ many/several/healing/healed /old/diffuse/localized/ visible/red/iv/fresh/dark/ needle/notable	Sentence:	Before: comments: extremities: mid line in upper right arm, scars and <u>old</u> track marks noted on mid arm After: <u>old</u> track marks noted on mid arm

Supplementary Table 2: Mappings between the query groups and the words in gold-standard answers most likely to provide inquired information and example answers for each mapping.

Query Groups	Words in Gold-standard Answers	Sample Answers
	Most Likely to Provide Inquired	
	Information	
Drug names	IV drug names from Table 2, opioid,	recent ivdu with meth and heroin
	opiate, oud	
Visible signs of IDU	Phrases for visible signs of IDU from	multiple <u>track marks</u> over extremi-
	Table 2	ties
Risky needle-using	Phrases for risky needle-using behavior	h/o sharing needles with gf
behavior	from Table 2	
Active/historical use	Temporal phrases from Supplemen-	active iv drug user up to day of ad-
	tary Table 1, remission	mission
Frequency of use	daily, occasional, regularly, often,	- iv cocaine daily, \sim \$5–40/day
	sometimes, frequently, intermittent	
Last use	Additional temporal phrases from Sup-	$\underline{\text{last}}$ ivdu >30 years ago
	plementary Table 1, last, quit, since,	
	clean	
Skin popping	Phrases for skin popping from Table 2	h/o drug injections - skin popping
Harm reduction	Phrases for harm reduction interven-	patient participates in <u>clean</u>
interventions	tions from Table 2	syringe program
Existence of IDU	Negation phrases from Supplemen-	denies any ivdu for many years
	tary Table 1	
Existence of IDU	Remaining answers	iv drug user

Supplementary Table 3: Statistics of the gold-standard dataset.

Property	Statistics
#Patients	1145
#Notes	2323
#Notes per patient (average)	2.03
#Samples in dataset	17410
#QA per note (average)	7.49
Note length (in words)	1013.09 (average), 1029 (median), 1785 (max)
Question length (in words)	6.72 (average), 7 (median), 14 (max)
Answer length (in words)	7.52 (average), 6 (median), 64 (max)

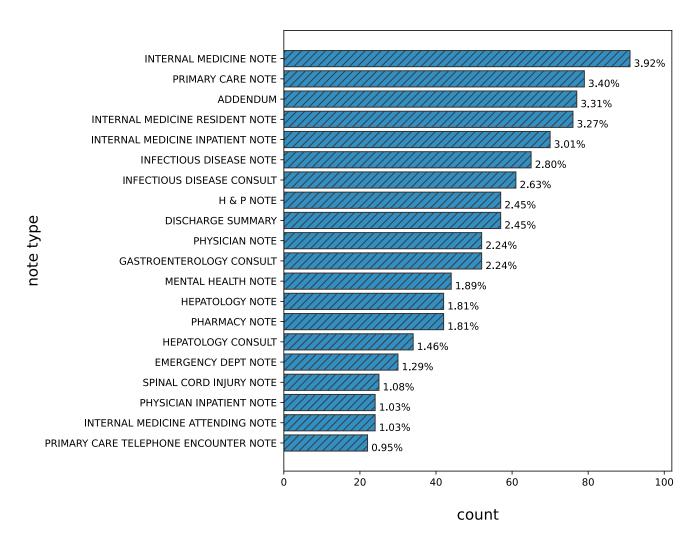

Supplementary Table 4: Statistics of the additional test datasets built using Cohort-Short and Cohort-Long.

Proporty	Statistics		
Property	Test Dataset (Cohort-Short)	Test Dataset (Cohort-Long)	
#Patients	100	100	
#Notes	203	146	
#Notes per patient (average)	2.03	1.46	
#Samples in dataset	1985	1110	
#QA per note (average)	9.78	7.60	
Note length (in words)	1336.53 (average),	1618.86 (average),	
	1117 (median), 5154 (max)	1224 (median), 5747 (max)	
Question length (in words)	6.51 (average),	6.92 (average),	
	7 (median), 14 (max)	7 (median), 14 (max)	
Answer length (in words)	7.59 (average),	8.56 (average),	
	7 (median), 21 (max)	7 (median), 43 (max)	

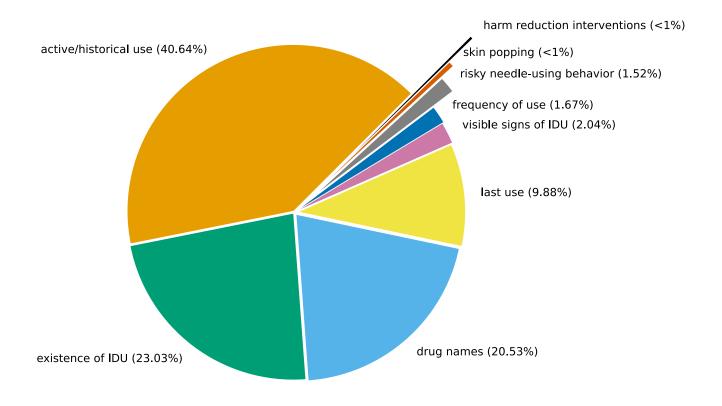

Supplementary Table 5: Examples of answers predicted by the QA model along with the question and the gold-standard answers.

Question	Gold-standard Answer	Predicted Answer
Has the pt ever injected	iv drug use: []yes [x]no	iv drug use: []yes [x]no
drugs?		
Which injection drugs?	iv heroin	attempted to overdose with the in-
		tent to die via iv heroin use
Does the patient have any	scars and old track marks	old track marks noted on mid arm
physical evidence of IDU?		
Does the pt have a h/o	sharing needles/injectin heroin/ co-	pos sharing needles
needle-sharing or using	cain in the past	
dirty needles?		
Is the patient actively using	h/o iv heroin use about 7 years ago	remote h/o iv heroin use about 7
IV drugs?	one time, but denies any iv drug use	years ago one time, but denies any
	since	iv drug use since.
What is the frequency of	daily heroin use with extensive ivdu	daily heroin use with extensive ivdu
pt's injection drug use?		
Does the patient have any	"skin popping" heroin 3-4 days ago	admits to "skin popping" heroin 3-
history of skin popping?		4 days ago and showed the under-
		signed a keloid scar on his left hand
		due to shooting heroin
When has the pt last in-	quit iv heroin and cocaine x 6 weeks	quit iv heroin and cocaine x 6 weeks
jected drugs?		
Has the patient received	topic covered: hiv, viral hepati-	syringe service program
any harm reduction inter-	tis, safe sex practices, pre-exposure	
ventions specific to IDU be-	prophylaxis syringe service pro-	
haviors?	gram, naloxone usage	

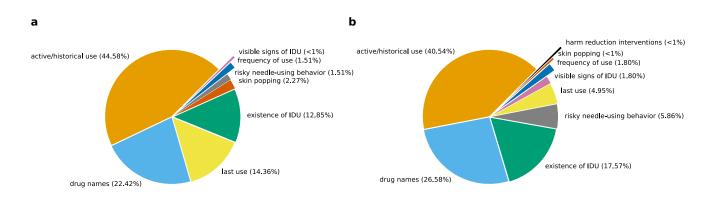

Supplementary Figures

Supplementary Figure 1: Twenty most frequently encountered clinical note types in this study, along with their frequency distribution.

Supplementary Figure 2: Distribution of the query groups in the gold-standard dataset

Supplementary Figure 3: Distribution of query groups in additional test datasets built using Cohort-Short (a) and Cohort-Long (b).
