

S.Figure 12

Supplementary figure 12. Induction of pyroptosis in KP-1.9 tumours extends median survival time in mice. (A) Tumour growth kinetics of parental KP-1.9 tumors or chimeric tumors (KP-1.9 + KP-1.9-N_{term}Gas) with or without doxycycline medicated feeding. (B) Comparison of Kaplan Meier survival in untreated and pyroptosis exposed KP tumours. Log-rank (Mantel-Cox) test was used for statistical analysis. N = 5 per group.
