

Supplementary Table S6. Detail information about hematologic toxicity.

Hematologic toxicity	Any grade Within 30d	Grade ≥ 3 Within 30d	Any grade at 30d	Grade ≥ 3 at 30d	Any grade at 90d	Grade ≥ 3 at 90d*
Neutropenia	7	5	3	1	0	0
Anemia	7	5	6	3	3	1
Thrombocytopenia	7	4	4	3	2	2
Lymphopenia	7	7	3	0	2	0

* Among the three cases of grade 3 cytopenia at day 90 after CAR-T infusion, Grade 3 anemia and thrombocytopenia was found in patient 2 who was non-responsive to CAR-T therapy, suggesting a possible association with the disease progression. Another Grade 3 thrombocytopenia was found in patient 6 at day 90 and eventually recovered to 112,000 per cubic millimeter at day 120 after CAR-T infusion.
