

Supplementary file

Suppl.1 The statistical data of Western Blot about the upregulation of VEGFA in CT26 and

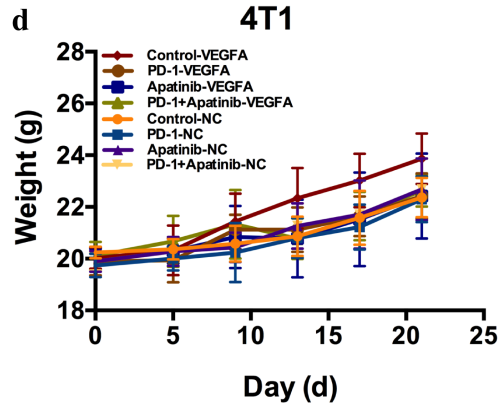

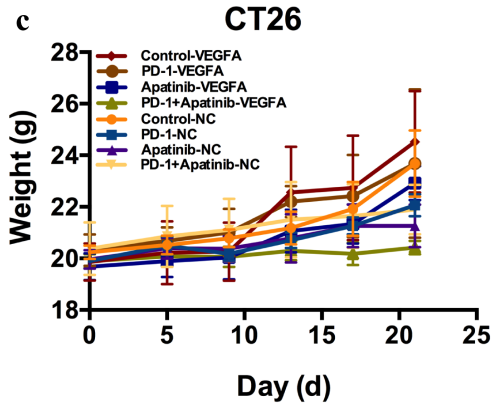

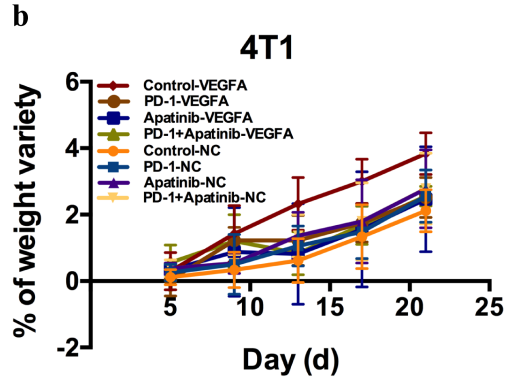

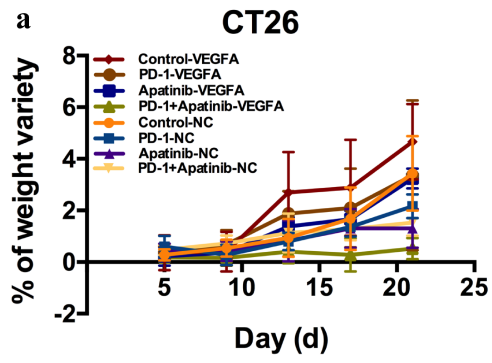

4T1 cells

Western blot detected the expression of VEGFA in both CT26 and 4T1 cells after infection with VEGFA lentivirus.

Suppl.2 Weight variety and weight of mice during the treatment period in CT26 and 4T1

groups

Weight of mice were monitored during the treatment. Mice in the control-VEGFA group experienced the greatest weight change due to rapid tumor growth.
