

Supplementary Material to “Phylomitogenomics of two Neotropical species of long-legged crickets *Endecous* Saussure, 1878 (Orthoptera: Phalangopsidae)”

a) RF for each gene in the group

b) RS for each species

Figure S2 - Rearrangements analysis with the web server qMGR, using the usual mitochondrial gene order of invertebrates as reference. a) RF of each gene within a particular group. b) Total RS of a species or a mitogenome.
