

Supplementary Fig. S2B

RPE/choroid 1 week

Strong cytokine response (356 protein changes)
Strong immune response
Decreased susceptibility to infection
 Up: Cell cycle control of DNA replication
 Down: Glycolysis
 Up: Actin cytoskeleton signalling
 No degeneration

8 weeks

Strong cytokine response (313 protein changes)
Strong immune response
Decreased susceptibility to infection
 Down: Integrin signalling

 Down: Actin cytoskeleton signalling
Degeneration

28 weeks

Strong cytokine response (385 protein changes)
Strong immune response
Decreased susceptibility to infection

 Up: Actin cytoskeleton signalling
 Some degeneration
