Supplementary Fig. S2C

Kidney

Strong cytokine response (497 protein changes)

Strong immune response

Decreased susceptibility to infection

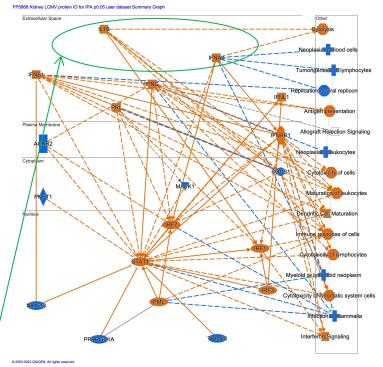

Down: Acetyl-CoA synthesis

Down: TCA cycle

Down: Oxidative phosphorylation

No degeneration

8 weeks

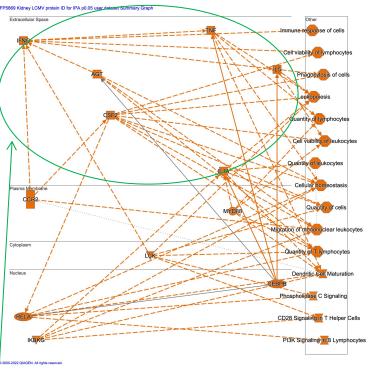

Moderate cytokine response (117 protein changes)
Strong immune response

Decreased susceptibility to infection

Little degeneration

28 weeks

Moderate cytokine response (86 protein changes)

Strong immune response

Decreased susceptibility to infection

No major STAT1 effect

Some degeneration
