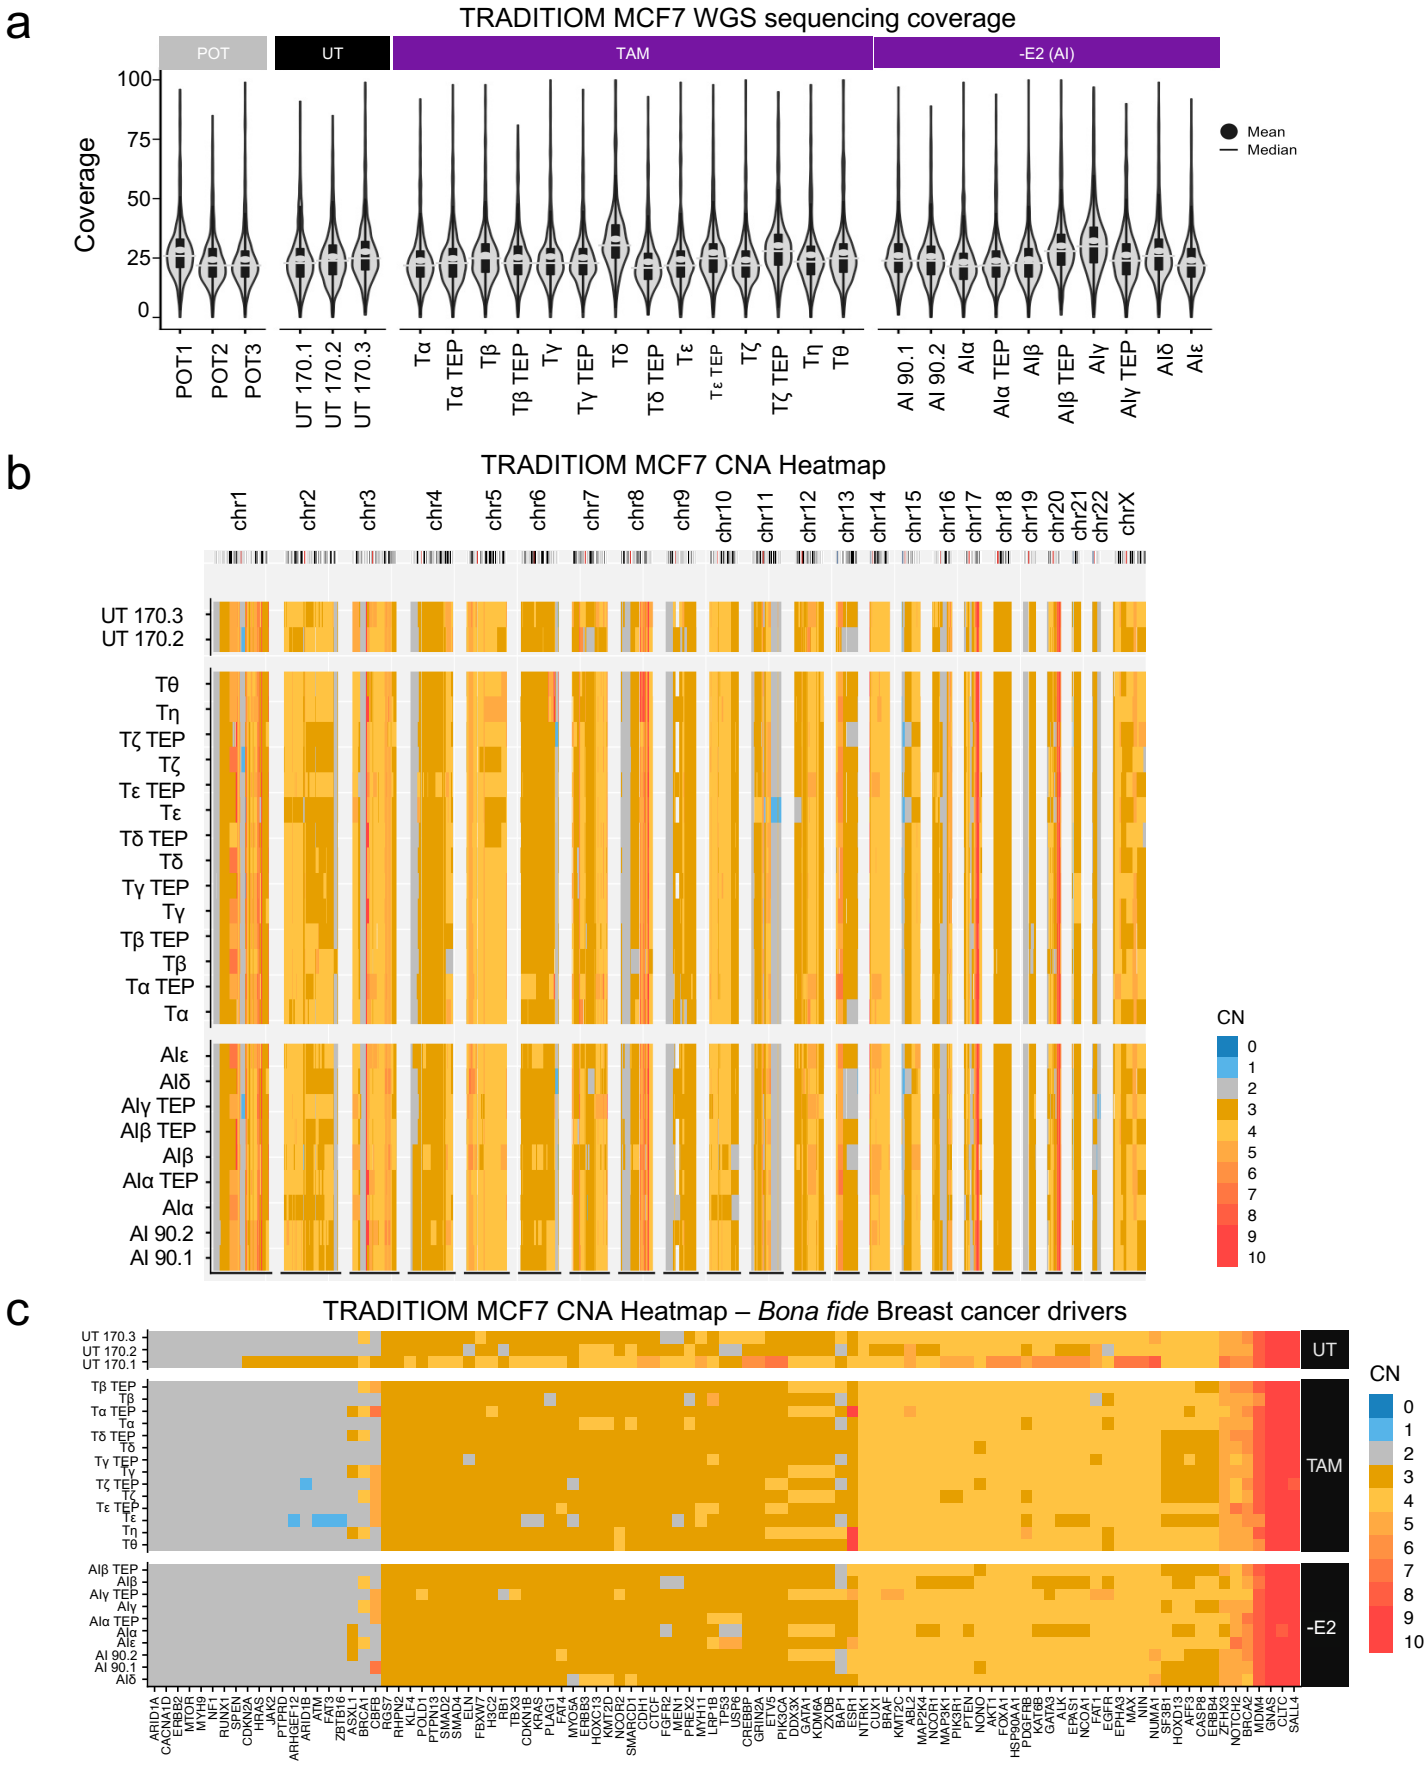
Supplementary Figure S13. TRADITIOM WGS Coverage and CNA map



Supplementary Figure S13. TRADITIOM WGS Coverage and CNA map. a) Sequencing coverage distributions (WGS) for all sites across TRADITIOM POT (pre-treatment) samples, awakening (early progression) and TEP (late progression) carbon copies (replicates). **b)** Genome wide heatmap of copy number alterations (CNAs) across carbon copies. **c)** Heatmap for CNAs across TRADITIOM MCF7 WGS dataset for *bona fide* breast cancer drivers. CNA profiles were obtained using sequenza (read-depth approach) against a panel of 30 normal samples from Heide *et al.* 2022 (Nature).
